FOURTH ANNUAL REPORT

OF THE

DEPARTMENT OF INSPECTION

OF THE

STATE OF INDIANA.

1900.

D. H. MCABEE, Chief Inspector.
Deputies:
D. F. SPEES, H. A. RICHARDS.

INDIANAPOLIS:
WM. B. BURFORD, CONTRACTOR FOR STATE PRINTING AND BINDING,
1901.

THE STATE OF INDIANA,
EXECUTIVE DEPARTMENT,
INDIANAPOLIS, December 4, 1900.

Received by the Governor, examined and referred to the Auditor of State for verification of the financial statement.

OFFICE OF AUDITOR OF STATE,
INDIANAPOLIS, December 5, 1900.

The within report, so far as the same relates to moneys drawn from the State Treasury, has been examined and found correct.

W. H. HART,
Auditor of State.

DECEMBER 5, 1900.

Returned by the Auditor of State, with above certificate, and transmitted to Secretary of State for publication, upon the order of the Board of Commissioners of Public Printing and Binding.

CHARLES E. WILSON,
Private Secretary.

Filed in the office of the Secretary of State of the State of Indiana, December 6, 1900.

UNION B. HUNT,
Secretary of State.

Received the within report and delivered to the printer this 6th day of December, 1900.

THOS. J. CARTER,
Clerk Printing Bureau.

STATE OF INDIANA.

ANNUAL REPORT

OF THE

Department of Inspection.

Hon. James A. Mount, Governor of Indiana:

Sir—In accordance with the provisions of the law creating the office of Department of Inspection and prescribing its duties and authority, I herewith submit to you a detailed statement of the action of the Department, which is my fourth annual report of the conditions as found in the manufacturing and mercantile establishments, mines, quarries, laundries, renovating works, bakeries and printing offices in this State at the close of the fiscal year, ending October 31, 1900.

I shall also venture to make such recommendations and suggestions as are reasonable and necessary for the health and safety of our people. In doing this I will not enter into an extended argument for their adoption, but will let the body of the report show the necessity for them.

The duties imposed upon the Department by the Legislature are varied and many. We are to inspect all manufacturing and mercantile establishments, quarries, laundries, renovating works, bakeries and printing offices; see that children under fourteen do not work in same; that affidavits are on file from the parents for those between fourteen and sixteen; that they do not work more than ten hours per day or more than sixty hours in one week; that those of this age who can not read and write, do not work except during the vacation of school; that the sanitary conditions are good: that

proper washrooms and closets are provided, with separate approaches where both sexes are employed; that all cogs, belts, gearing, saws, and other dangerous machinery are properly guarded; that satisfactory communication is provided between engineer's room and each room where machinery is run by steam; the maintenance of safeguards at hatchways, elevator openings, and well holes in factories and mercantile establishments; require fire escapes on hotels, public buildings, public or private institutions, sanitarium, surgical institutes, asylum, schoolhouse, dormitory, or place of public resort, and every building in which persons are employed above the second story in factories, workshops, or other establishments; forbidding the use of portable seats in aisles or passageways of churches, theaters, halls or schoolhouses; to require fire resisting curtains in all theaters; see that hotels have competent watchmen; also, lights, gongs, or other suitable alarms, and notices posted describing means of escape from fire in hotels and lodging houses more than three stories high; prohibiting the locking of doors during working hours; that proper handrails are provided on all stairways; that they are properly screened at sides and bottom and, if necessary, shall be covered with rubber; that proper air space is provided, and that sufficient ventilation is maintained; to see that all accidents are reported to this office, examine into the cause of same and recommend that which will prevent their recurrence; see that the weekly wage law is enforced as well as all laws for the benefit of labor.

There are none of these duties but what are in the interest of the one hundred and thirty thousand two hundred and forty workmen whom we have found in the industrial establishments of the State.

We are thus keeping abreast of the times and of other States, who have very similar laws enforced by a corps of inspectors, thus proving to the workmen that the State is interested in their welfare to the extent of placing laws for their protection on the statute books and seeing that they are enforced.

It will be seen at once, that with the present force of one chief and two deputies, that many of the establishments in the State will not be visited, and of the seventeen hundred and sixty-two inspections made, they, of necessity, have been of a superficial character, scattered as they have been in seventy-seven counties. The number of orders issued from this office which have been complied with

have been of such a character that the results can not but be of the greatest benefit to the employes, as well as to the employer.

There are very few places in the State but where the Inspector meets with a hearty welcome by the proprietor, and is usually accompanied by him through the entire plant to hear any suggestion that may be offered.

The compliments passed on the methods of the Department have been frequent and cordial.

EXHIBIT AT THE INTERNATIONAL EXPOSITION, PARIS, 1900.

As stated in our former report, we, through Wm. F. Willoughby, special agent of "Educational and Social Economy," placed on exhibition a complete set of blanks and our method of conducting the business of the Department, for which we have been officially informed that we have been awarded, by the authorities of said exposition, "the diploma of a gold medal." This diploma brings to us a bronze medal, as well as the privilege of purchasing a gold medal from the French authorities for the sum of six hundred francs.

The award is very pleasing to us, as none others of this class received a higher award, thus placing the Department of this State on the same plane of proficiency as much older departments.

The privilege of purchasing a gold medal is respectfully declined.

CONVENTION.

I had the pleasure, on behalf of the State, of entertaining the Fourteenth Annual Convention of Factory Inspectors. The attendance was large. Interesting, as well as profitable papers, were read and discussed. Through the courtesies of the Commercial Clubs of this city and Anderson, and Charles L. Henry, President of the Union Traction Company, and a committee with the Mayor, F. M. Harbitt, of Elwood, at its head, we were enabled to show our guests some of the largest institutions of their kind in the country, as well as the advantages we claim as a manufacturing State. The

trip was greatly enjoyed by all our visitors, who expressed themselves as being surprised at the extent and combination of our factories and fields.

THE INDUSTRIES OF THE STATE.

The industries of the State are in an exceedingly flourishing condition. Many places are short of both skilled and unskilled labor. Wood, glass, iron, cement and stone are those which have been visited by us.

The glass industry being a comparatively new one, I single it out for special notice. Within the State is manufactured everything in glass, from the small homeopathic vial to the largest cathedral or memorial window. The three large plate glass factories whose product, which this year will be six million feet, has almost superseded the French and German plate for mirrors, has given employment to many skilled workmen in bevel and mirror establishments. Mexico has ordered largely from these works.

The opalescent and cathedral manufacturers furnish the finest colors for the designer of cathedral and art windows. The products of our bottle and prescription houses are being filled and shipped to all points of the globe, while the tableware factories are placing their products on the tables of all our people, for few are so poor but what the dinner table is decorated with some of their ware. The surplus is finding a ready market in the Australian ports of Melbourne and Sidney, as well as England, the Hawaiian Islands, Cuba, Porto Rico and South America. English agents promise to distribute them all over Europe, thus giving continuous employment to our workmen. Manufacturers say that wherever our wares are introduced their superiority is recognized and rapidly displace the goods of other countries.

The lamp-chimney houses are in operation only nine months of each year, and of the seven million dozen of lamp chimneys made in the United States Indiana's quota is two million five hundred thousand dozen. We export these goods to Central and South America, West India, and the Sandwich Islands. Trade is just opening up with South Africa, Japan, and China. Lamp chimneys are imported from Belgium, Austria, Germany and France, so the imports about equal the exports.

The window houses are springing up so fast in the State that every trip of the Inspector is sure to find some new ones in operation. So we take front rank in the manufacture of glass, and give employment to more than fifteen thousand in this one industry.

The industries inspected by this Department require the steam from boilers with a capacity of 228,269 horse-power, furnished to engines with a power equal to 177,017, while gas and gasoline engines furnish close to 2,500, electric motors, approximating, 700, while we have reported water to the extent of 850, making a grand total horse-power of 181,067.

WHERE FOOD PRODUCTS ARE MANUFACTURED.

In making our inspections in bakeries, confectioneries, and canning establishments, to look after the machinery, we see many things that should be remedied, especially from a sanitary point of view. In the absence of a specific law we can only, in a general way, issue orders for their betterment.

There should be a bakeshop law, similar to those of other States, requiring certain sanitary conditions wherever food products are manufactured. Such a law would add but little to the duties of the Department. As already stated, we have to visit these places without the authority to issue sanitary orders. The general public has little idea of the conditions existing in some of these places.

CHILD LABOR.

One of the most important features of our duties relates to child labor. We have endeavored to pay as much attention as possible to this part of the law, but when we are only able to visit a factory once in twelve months, those who are inclined to take advantage of our absence and fill in their shops with children under age are in little danger of being discovered for doing so. We have instituted suit against the following firms, who were found guilty and fined, viz.:

The Lapel Flint Glass Co., fined thirteen dollars and ten cents; the Lapel Bottle Co., thirteen dollars and ten cents; the Sneath Glass Co., Hartford City, nine dollars and eighty-five cents; the

Muncie Glass Co., nine dollars and fifty cents; and two suits against foremen of the Pennsylvania Glass Co., of Anderson, who were fined, but appealed to the Circuit Court.

Doubtless there have been other violations, but in the main the law is being observed. Those who employ the greater number give us the least cause to complain. We find that there are two thousand and fifty-eight boys and five hundred and fifty-eight girls under the age of sixteen years at work in the places we have visited.

DEPARTMENT STORES.

The elimination of the nine or ten-year-old cash girls and boys from the department stores, and the placing of seats for the use of female employes have changed the expression on the faces of those employed. That weary backache expression is not seen nearly so often in these places as formerly. Could we succeed in having all of them (some now do) close at a reasonable hour on Saturday, another step would be taken in their interest, with scarcely any inconvenience to the general public.

THE WEEKLY WAGE LAW.

The enforcement of the weekly wage law has met with considerable opposition, mostly from the larger corporations who have adopted a system of bookkeeping, which, at the close of each month, answers all the purposes of a balance sheet, and any other than monthly or semi-monthly payments would interfere with this arrangement.

We have instituted suits against some of the largest corporations in the State, one on mandamus proceedings, the other a straight suit for nonobservance of the law. In the first case Judge Ryan, of Anderson, holds the law constitutional (see Exhibit D), as does Judge Leffler of the Delaware Circuit Court. They are now on their way to the Supreme Court.

It is with the contractors and subcontractors doing work for railroad companies that the most complaint arises. Most of these people are from other States, and are either an unscrupulous lot or permit their men to be robbed in many ways. One way is to change

time-keepers just before the monthly payday and then have the men credited with several days less time than they actually made. When the men call their attention to it, they make the excuse that they don't know anything about it; the man who kept the time is out of the State.

The amounts are so small that it would cost more than it would be worth to collect it by law. Another method is to discharge or lay off a man and give him a time check for what is due him; then have a silent partner buy these checks at from ten to fifty per cent. discount. These and many other means are used to rob those who can least afford to be robbed, the men who work for the lowest wages, the unskilled workmen.

We have endeavored to correct these abuses and have been partially successful. The law's delay has, however, caused us to resort to other means of settlement. We believe if the law was changed so as to make it a misdemeanor, subject to a fine for not paying promptly, as the law directs, that it could be enforced with better success and with a greater degree of justice than at present.

ACCIDENTS.

The Department has used every effort to have all accidents reported to this office, together with the loss of time in days, loss of wages, cost of medical and burial expense, wages paid during disability and benefits from other sources. Of the five hundred and seven accidents reported we have received a detailed statement from three hundred and thirty-five. The average time of disability is twenty-three days, or a total of eleven thousand six hundred and sixty-one days, almost forty years of one man's time, at a loss of twelve thousand two hundred and eighteen dollars in wages, or twenty-four dollars and ten cents for each accident, and medical fees of thirteen dollars and sixty cents for each accident, making a total of six thousand eight hundred and ninety-five dollars and twenty cents, mostly paid by the manufacturers. Besides being paid wages amounting to three thousand three hundred and eighty-six dollars and seventy-six cents, the injured parties also received the sum of three thousand six hundred and twenty-five dollars and five cents from beneficial organizations and collections, making the

entire cost of five hundred and seven accidents amount to thirty-six thousand one hundred and twenty-five dollars and seventy-one cents.

While these figures are not just exact, the above deductions show the cost of carelessness and unguarded machinery to both the employer and employe.

The treatment of employes, when injured, by the different firms and corporations, is very marked, and am pleased to say a large number of them pay every attention possible, by procuring medical attention, or carry an insurance for their people, at their own expense, as well as oftentimes paying the regular wages until their recovery; while a few, a very few, pay no attention whatever. They can only report that on a certain day James Blank was injured. Further than that they answer, "Don't know," and apparently have no further interest in the matter. The per cent. of those injured is one-half of one per cent. of those employed.

We are convinced that by complying with the Inspector's orders this ratio can be reduced very materially, especially if we could investigate the cause of all accidents occurring on machinery a day or so after their occurrence. It would be but a few months until they would be at a minimum. As it is, we do not reach the place where they occurred until months afterward, when its cause is almost forgotten and our recommendations fall on deaf ears.

So far there does not appear to be any diminution in the number of accidents reported. We can only account for the apparent increase by saying that the manufacturers are learning to report more promptly those which do occur, and that quite a number have occurred in places where our inspectors have been unable to reach them. A larger number have occurred through carelessness than through any other cause. Despite all our efforts men will remove the safety devices provided by their employers, or positively refuse to operate the machines with them attached, and in some cases have paid the penalty for such refusal by having their hands or arms mangled. Yet we see a very great improvement as to the number of these devices in use. Within a short time their absence will attract more attention than do their use at the present time.

BOILER EXPLOSIONS.

Boiler explosions have been more numerous than they should have been. Since our last published report there have been sixteen killed and twenty-seven injured by the explosion of steam boilers. That these accidents may be prevented in the future and the lives of those working in the immediate vicinity be made safer, the following precautions should be made compulsory on all owners of such boilers: First, the seller of a second-hand boiler should be compelled by law to furnish the purchaser a certificate of condition, signed by a practicable boiler-maker, after a thorough examination, stating the actual condition and working pressure that could safely be carried. Second, all operators of steam boilers, carrying more than twenty pounds of steam, should be required to keep on file, in this office, a certificate of inspection made by a practicable boiler-maker. This certificate of inspection to be renewed yearly, or oftener if, in the judgment of the Department, it is thought necessary. Third, making it a finable offense to operate a boiler of the above description without the following devices: a steam gauge, a safety valve, water gauges and a water column, all to be kept in first-class condition, as well as a fusible plug in all internally fired boilers.

These devices could all be examined by any deputy inspector, and, with a licensing engineer's law, would prevent many of the disasters which are occurring in our State because we do not compel the taking of these precautions. There are none of these safety devices but what are used by all first-class establishments and, as they are comparatively inexpensive, there is no reason why the State should not require their use.

With these precautions and a competent engineer in charge, whose whole time is given to his boiler and engine, we will have fewer explosions with their accompanying destruction of life and property.

FIRE ESCAPES.

There have been issued from this office one hundred and thirty-seven orders for fire escapes, and they are in most cases complied with. Some of the noncompliances have been for the purpose of

remodeling the buildings, and in a few cases the law, as it now is, would be of little use in case of fire; that is, where there are several hundred persons, on the third or higher floor, to be provided for, and perhaps but one place to locate said escape. As it is, we can only order an eighteen-inch stairs, which, in such cases, would afford scarcely any relief. We are therefore waiting to see if the law can not be changed to suit the capacity of the buildings.

The fire-escape law should be applicable to all three-story buildings used as hotels or lodging houses. These are now exempt from the erection of escapes, as well as that of keeping a night watchman on duty. The rapidity with which fire spreads through buildings of recent construction can only be accounted for by saying that so much more soft and resinous woods are being used than formerly, and instead of mixing paints with vegetable oils, mineral oils are used in their place, both as mixers and dryers. Consequently, greater care must be taken to prevent just such disasters as those which are occurring constantly in hotels of this class.

It should not be necessary for a hotel to have fifty or more rooms before keeping a watchman on duty at all hours of the night. The Department has received many complaints from traveling men of the dangerous condition of many hotels to which the law does not apply.

STATE INSTITUTIONS.

My deputies and myself visited the Central Hospital for the Insane, and later, in company with Chief Barrett, of the Indianapolis Fire Department, we made a very thorough inspection of all the State institutions near the city. I believe it my duty to report to you the conditions as found by us. The south or old building of the insane hospital has no cross or firewalls above the ceiling of the upper floor. The attic being open from end to end, a fire would spread in a few minutes over the entire building.

The cross or fire walls in the north building extend up to the roof, which would only delay the spreading of fire for a short time. These should be extended through the roof and all openings through these walls should be closed by fire doors, as should doors through solid walls. It would then be possible to confine the fire to one portion of the building.

Recognizing the fact that it is necessary that the doors be locked and the windows barred in these institutions, as well as in the Woman's Prison and Female Reformatory, we feel that the present method of having these bars built into the wall or fastened in a stationary manner should not be permitted longer than it is necessary to change them to hinges and fastenings, which could be operated from some central or other position. As they now are, should an attendant be unable to release all those under her charge during a fire, they could not be aided by those on the outside.

The boiler-house of the female prison is a menace to the entire institution and should be replaced by a fire-proof structure some distance away from the main buildings, where all cooking and laundering should be done.

The Indiana Institution for the Education of the Deaf and Dumb we find in fair condition so far as fire protection and escapes are concerned, as is also the Indiana Institution for the Education of the Blind. The latter we believe to be better provided in every way than any other State institution.

MEANS OF PREVENTING SPREAD OF FIRE.

We would recommend that all buildings hereafter erected that come under the fire-escape law should be compelled to comply with the following means of preventing the spread of fire. These could only be carried out and enforced by having the plans and specifications submitted to this, or some other office, for approval and inspection during erection:

1. All elevator wells and light shafts, unless built of brick, must be filled in flush between the studs with fire-proof materials, or lined with metal or plastered on metallic lathing, as may be directed by the Inspector.

Elevator doors and casings to be lined with tinplate, lock-jointed.

2. Where floor beams rest on partition caps or on girders, wall girts or on wooden sills, fill in between such beams, from the caps, girders, girts or sills to the lining floor above, solid with brick and mortar or other fire-proof material.

3. When floor beams in frame buildings rest on ledger boards, fire-stop thoroughly at each floor with brick and mortar resting on bridging pieces cut in between the studs, or, where practicable, on the ends of lining floor.

4. In brick buildings the space between the furrings on the outside walls or brick partition should be filled flush with mortar for a space of five inches in width above and below the floor beams of each story.

5. Where basement or other flights of stairs are enclosed by partitions of brick or wood, the space between the studs or wall furrings must be so fire-stopped with brick or mortar as to effectually prevent any fire from passing up between such studs or furring back of the stair stringers.

6. The soffits of all such enclosed stairs, and also partitions on stairway side, must be plastered on metal lathing.

7. Where a building is occupied above the first floor for any purpose which renders it subject to the provisions of Chapter 207 of the Acts of 1899, and the lower story is occupied for stores, or other purposes not connected with the upper floors, the stairways leading to such upper floors must be enclosed with brick walls or with wooden partitions filled solid with brick laid in mortar, or other fire-proof material, and plastered on both sides on metallic lathing, and all doors in such partitions lined with tin plate, lock-jointed.

8. All long flights of stairs to have two smoke-stops in each flight properly constructed.

9. No pipes for conveying hot air or steam should under the law be placed nearer than one inch to any wood-work unless protected, to the satisfaction of the Inspector, by suitable guards or casings of incombustible material.

10. No wooden flue or air duct of any description should be used for heating or ventilating purposes.

11. A space of at least one inch should be left between all woodwork and the chimneys, also around all hot air, steam and hot water pipes; the spaces around chimneys and pipes, where they pass through floors, should be stopped with metal or other fire-proof material, smoke-tight. Steam and hot-water pipes to have metal sleeves.

All channels and pockets for gas, water and soil pipes to be made smoke-tight at each floor.

12. The space around all metal or brick ventilating ducts must be fire-stopped at each floor with metal or other fire-proof material, as approved by the Inspector.

13. All chimneys to be plastered with one good coat of brown mortar, on the outside of brickwork, from cellar to roof.

14. The ceiling over furnaces or boilers and over indirect radiators must be plastered on metal lathing, said plastering to extend at least six feet in front of feed door and two feet on each side of furnace or boiler casing. There should be not less than one foot in height of open air space between the tops of furnace or boiler casing and the ceiling.

15. The entire cellar ceilings of schoolhouses and other buildings used for public purposes should be plastered on metallic lathing.

FINANCIAL STATEMENT.

RESOURCES.

Amount appropriated by General Assembly, salaries	$4,400 00	
Amount appropriated by General Assembly, incidental expenses	1,500 00	
Total		$5,900 00

DISBURSEMENTS.

Salary of Chief Inspector, November 1, 1899, to October 31, 1900, inclusive	$1,800 00	
Salary of Deputy Inspector, D. F. Spees, November 1, 1899, to October 31, 1900, inclusive	1,000 00	
Salary of Deputy Inspector, H. A. Richards, November 1, 1899, to October 31, 1900, inclusive	1,000 00	
Salary of stenographer, Edna Robinson, November 1, 1899, to October 31, 1900, inclusive	600 00	
Traveling expenses of Chief Inspector, November 1, 1899, to October 31, 1900, inclusive	234 91	
Traveling expenses of Deputy Inspector, D. F. Spees, November 1, 1899, to October 31, 1900, inclusive	543 12	
Traveling expenses of Deputy Inspector, H. A. Richards, November 1, 1899, to October 31, 1900, inclusive	405 53	
Postage, November 1, 1899, to October 31, 1900	309 00	
Balance remaining in State Treasury of amount appropriated for expenses	7 44	
Total		$5,900 00

RECAPITULATION.

Number of inspections made during the year	1,762
Number of inspections made by D. F. Spees, Deputy Inspector	945
Number of inspections made by H. A. Richards Deputy Inspector	817
Total number employed	130,240
Total number of males employed	112,430
Total number of females employed	17,810
Total number of males under the age of 16 years	2,058
Total number of females under the age of 16 years	558
Number of orders issued	1,154
Buildings on which fire escapes were ordered	137
Number of escapes inspected and accepted	79
Number of accidents reported to this office, more than slight	507
Number of accidents reported to this office, slight	109
Number of fatal accidents, boiler explosions	9
Number of fatal accidents, saws	4
Number of fatal accidents, shafting	4
Number of fatal accidents, miscellaneous	17

Total number of fatal accidents	34
Number of accidents to those under the age of 16 years	27
Capacity of steam boilers, horse-power	230,842
Horse-power of engines	177,017
Horse-power of gas and gasoline engines	2,500
Horse-power of electric motors	700
Horse-power of water	850
Total	181,067

OTHER RECOMMENDATIONS.

Should the recommendations, or any part of them herein made, become laws, I recommend the appointment of a chief deputy and two additional deputies, so that the laws may be properly enforced.

The passage of a licensing engineer's law would necessarily have to provide for an examining body. Such board would be of no expense to the State, as the fees from licenses would cover all salaries necessary for such body. They should be a part of this Department and under the direction of the Chief Inspector.

The expenses for the Department are limited to fifteen hundred dollars. This perhaps would be sufficient for the present force were it not for the large amount of postage necessary for the mailing of blanks and sending copies of the report to all whom we have visited. Our postage took three hundred and nine dollars from our fund for traveling and hotel purposes, leaving but eleven hundred and ninety-one dollars traveling expenses for my deputies and myself, which amount is just about enough for the deputies. I respectfully suggest that four hundred dollars be allowed for office expense, which would cover postage and other necessary outlay.

I desire to extend my sincere thanks to the Attorney-General and his assistants and to all prosecuting attorneys with whom I have had official relations, for their uniform kindness and prompt action taken by them when called upon. Also, to my deputies, D. F. Spees and H. A. Richards, who have been earnest and faithful in the discharge of their duties. No word of complaint has been made of their conduct, and but few with reference to their judgment, and these instances were where fire escapes had been ordered.

Respectfully yours,

D. H. McABEE,

Chief Inspector.

EXHIBIT C.

Orders Recommended by the Deputies

AND TO

WHOM ISSUED BY THE CHIEF INSPECTOR.

EXHIBIT C.

Orders Recommended by the Deputies and to Whom Issued by the Chief Inspector.

No. 1—November 16. Peter Klerner, New Albany: Place guard over top of resaw; enclose engine drive pulley with guard rail on factory side.

No. 2—November 16. New Albany Package and Basket Co., New Albany: Keep on file in your office affidavits from all between fourteen and sixteen years of age; also post hours of labor, etc.

No. 3—November 17. New Albany Hosiery Co., New Albany: Provide means of escape for employes on third floor in case of fire in vicinity of stairway; cover or countersink all projecting set-screws on end of all shafting; provide at least two additional closet seats for females.

No. 4—November 17. New Albany Woolen Mill Co., New Albany: Place guard rail between drive pulley and engine. Cover or countersink all projecting setscrews in collars on shafting.

No. 8—November 17. Henry Klerner Furniture Co., New Albany: Place guards on all saws where practicable; place shield in front of lower pulley on band saws.

No. 11—November 18. Terstegge-Gohmann Co., New Albany; Cover gear on rattler in moulding-room; place safety grip on cupola elevator.

No. 14—November 20. Conrad & Kammerer, New Albany: Place hand rail about floor opening of stairway, second floor, south end of dryroom.

No. 15—November 20. A. Hopkins & Co., New Albany: Place guards about floor openings.

No. 18—November 20. Chas. Hegewald & Co., New Albany: Place shield before under pulley of band saw; cover exposed gearing on punch press.

No. 19—November 20. Gardner & Drysdale, New Albany: Place guard over punch press gear, rear side.

No. 20—November 20. Jno. Schrader, Jr., Co., New Albany: Place safety devices on elevator in factory.

No. 22—November 21. Republic Iron and Steel Co., New Albany: Cover or countersink all projecting setscrews in collars on pulley journal.

EXHIBIT C.—Orders Issued—Continued.

No. 24—November 21. J. M. Robinson & Co., New Albany: Secure affidavits from all boys under sixteen years of age and keep them on file in the office.

No. 27—November 22. Ed J. Howard, Jeffersonville: Place guards before exposed gear on punch presses, "Dewey" and "Sampson," in south end of shop; protect gear by flywheel on large plate roller outside of shop; secure affidavits from all boys under sixteen years of age and keep them on file in the office.

No. 28—November 22. M. A. Sweeney Ship Yard and Foundry Co., Jeffersonville: Cover gears on two punch presses and guard flywheels on same; secure affidavits from all boys under sixteen years of age and keep them on file in the office.

No. 29—November 22. American Car and Foundry Co., Jeffersonville: Secure affidavits from all boys under sixteen years of age and keep them on file in the office.

No. 30—November 22. The Falls City Chain Works, Jeffersonville: Cover exposed gear; cover or countersink all projecting setscrews on end of rattler gang.

No. 31—November 23. Bromwell Brush and Wire Goods Co., Jeffersonville: Restore and put in good order exhaust flues on sander machines.

No. 35—November 23. The Indiana Manufacturing Co., Jeffersonville: Enclose with portable guard lower pulley of band saw in machine shop; place guard over rip saw, south end of shop.

No. 36—November 24. Louisville Cement Co., Sellersburg: Place some means of communication between mill and engineer's room—speaking tube or alarm whistle; enclose all pitfalls under mill; guard all exposed gearing over which passage is necessary and near passageways; secure affidavits from all boys under sixteen years of age and have them on file in the office.

No. 37—November 24. Union Cement and Lime Co., Sellersburg: Enclose or guard exposed pinions on second floor, as pointed out to Mr. Enders, and all other exposed gears along passageways; secure affidavits from all boys under sixteen years of age and keep them on file in the office.

No. 38—November 24. Clark County Cement Works, Sellersburg: Guard all exposed gearing and pinions near passageways and within six feet of floor.

No. 39—December 4. DeWitt-McIntyre Lumber Co., Oakland City: Place guard rail between engine flywheel and engine.

No. 40—December 5. White & Dunning, Oakland City: Enclose outside belt pulleys and belts in sawmill shed.

May 15. Enclose elevator floor opening with railing or lifting gate, as suggested.

No. 42—Hartwell Manufacturing Co., Huntingburg: Enclose lower band saw pulley, as suggested; secure affidavits from minors between the ages of fourteen and sixteen and keep them on file in the office; post laws.

EXHIBIT C.—Orders Issued—Continued.

No. 44—December 5. Depot Planing Mill Co., Huntingburg: Enclose under pulley of band saw and place guard over edging saw, as suggested.

No. 45—December 5. Huntingburg Dry Pressed Brick Co., Huntingburg: Place guard over inward acting power gear, front and rear sides of U. S. press. Cover or countersink all projecting setscrews in collar on end of line shaft, second floor. Secure affidavits from minors between the ages of fourteen and sixteen years and keep them on file in the office.

No. 47—December 6. Jasper Furniture Co., Jasper: Place inside stairway or iron outside fire escape at north end of building from third floor to second floor.

No. 48—December 6. Jasper Veneer Mills, Jasper: The steaming vats or pools must be well guarded. Place a swinging gate on west side of pool and guard rails on passageway sides.

No. 51—December 6. Indiana Spoke and Lumber Co., Birdseye: Place guard over equalizing cutoff saws, where exposed; cover or countersink all protruding setscrews in collar on sander pulley mandrel.

No. 53—December 7. Dering Bros. Hardwood Lumber Co., Petersburg: Place guard in front of lower pulley of band saw.

No. 54—December 7. E. H. Goslin & Co., Petersburg: Place guard over resaw; inclose lower pulley of band saw.

No. 55—December 7. Thos. Read, Petersburg: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file in the office.

No. 58—December 12. Charles M. Allen, Alfordsville: Place guard over resaw and over edger.

No. 59—December 12. George S. Fry, Alfordsville: Cover or countersink all protruding setscrews in collars on shafts and machinery; secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file in the office.

No. 60—December 12. The M. J. Carnahan Co., Loogootee: Place guard on woodworker; place guard on exposed side of resaw; adopt exhaust fans or conveyors for the removal of dust and shavings from planer, shapers, sanders, etc.

No. 61—December 13. J. Schofield & Son, Madison: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file in the office.

No. 63—December 13. John W. Thomas, Madison: Place guard over equalizing saws as suggested; secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file in the office.

No. 64—December 14. City Planing Mill Co., Madison: Place guard on passage side of resaw as high as top of saw.

No. 67—December 14. Barker Tobacco Co., Madison: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file in the office.

EXHIBIT C.—Orders Issued—Continued.

No. 68—December 14. W. Trow Co., Madison: Cover or countersink all projecting setscrews in collars on shafting and machines. Section 5 of the same law requires elevator ways to be properly inclosed. Entrance to same must be kept closed.

No. 69—December 14. McKim-Cochran Furniture Co., Madison: Place portable apron before lower pulley of band saw; provide communication between machinery and engine-rooms; provide elevator lift gate on second floor to elevator entrance, as suggested.

No. 75—December 15. Madison Brewing Co., Madison: Cover open space between up and down belt, operating mixer in mixer tub on first platform.

No. 77—December 15. Albert Schad, Madison: Put frame apron before lower pulley of band saw.

No. 79—December 16. Thomas Graham & Co., Madison: Place substantial guard before flywheel and pit, and close passage between upper and lower belt in engine-room; inclose or guard equalizing saws from both sides and rear.

No. 80—December 16. S. M. Stroeder, Madison: Locate fire escape on north end of Union Lodge building; upper balcony embracing either second or third window from alley on third floor with forty-five degree iron stairway landing on balcony on level with second floor with drop ladder to ground.

No. 82—December 16. B. G. Law, Gresham, New Central Hotel, Madison: Place fire escape at hall windows, east end of hall, third floor; lower balcony on level with second floor, upper and lower balcony connected by incline stairway.

No. 83—December 16. A. E. Haigh, Madison: Place fire escape on northeast corner of third story school building, locating upper balcony around first windows from northeast corner on third floor, with balcony at second floor and from thence with stairway to ground.

No. 84—December 16. E. G. Niklaus, Madison: Place lawful fire escape on northwest corner of K. of P. building, alley side, upper balcony embracing first window (third floor) from street front to windows on level with second floor, with drop ladder to ground.

No. 85—December 16. J. R. Gorgas, Madison: Place additional means of exit from north end of I. O. O. F. lodgeroom by constructing a permanent stairway from present floor opening in small room (northeast corner of building) to second floor landing of present stairway from first to second floor.

No. 86—December 18. Hisey Machine Works, Aurora: Cover or countersink all projecting setscrews in collars on shafting.

No. 87—December 18. Stedman Foundry and Machine Works, Aurora: Cover or guard all exposed inward moving gears and pinions; cover or countersink all projecting setscrews in collars on shafting and machinery.

EXHIBIT C.—Orders Issued—Continued.

No. 88—December 18. The Samuel Wymond Cooperage Co., Aurora: Place upright guards on each side of equalizing saws and cover or countersink all projecting setscrews in collar on shafting.

No. 89—December 18. Aurora Tool Works, Aurora: Place hand rail about floor opening to boiler pit.

No. 90—December 18. Aurora Chair Co., Aurora: Secure affidavits from all minors between the ages of fourteen and sixteen years of age and keep them on file in the office.

No. 91—December 18. Cochran Chain Co., Aurora: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file in the office; cover or countersink all projecting setscrews in collar on counter shaft of second shaper; enclose lower pulley of band saw.

No. 92—December 18. The Hogan Shoe Co., Aurora: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file in the office.

No. 93—December 18. Aurora Coffin Co., Aurora: Inclose drive belt with guard rail on boiler side.

No. 96—December 19. A. B. Patterson, Aurora: Place fire escape at southeast corner of I. O. O. F. building, upper balcony, embracing first window from corner on third floor, taking in same window at second and third stories, with drop ladder to ground.

No. 97—December 19. G. W. Mitchell, Aurora: Place iron stairway with double hand rails from banquet room, bay window, to one story roof below, said stairway to be thirty-six (36) inches wide.

No. 98—December 19. G. C. Probst & Co., Aurora: Clear rear stairway of debris and make all steps safe from top to bottom; make all doors open down and outward; locate an additional exit midway from front to rear on alley side (west side), by cutting window to floor level and constructing fire escape to landing below.

No. 201—November 9. Muncie Glass Co., Muncie: Discharge from your employ all boys under fourteen years of age; keep a list of the names of all boys under sixteen years and girls under eighteen years posted in the rooms where young persons are employed; secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file in the office.

No. 202—November 10. The Eaton Manufacturing Co., Eaton: Cover or countersink all protruding setscrews; and place guards on all rip saws.

No. 205—November 10. Ames Buggy Bow Co., Eaton: Place guards on all rip saws.

No. 206—November 10. The Paragon Paper Co., Eaton: Cover or countersink all protruding setscrews; pay in accordance with the weekly wage law, Chapter 134, Section 1.

No. 207—November 10. Eaton Stone Quarry and Lime Co., Eaton: Pay in accordance with the weekly wage law, Chapter 134, Section 1.

EXHIBIT C.—ORDERS ISSUED—Continued.

No. 208—November 13. Ball Bros Manufacturing Co., Muncie: Cover or countersink all protruding setscrews; place railing around flywheel of air compressor in engine-room.

No. 213—November 14. American Strawboard Co., Anderson: Cover or countersink all projecting setscrews; box in all shafting where men have to step over or crawl under it; box in all gear wheels and belts on beaters.

No. 214—November 16. The Wetherall Works, Frankton: Cover or countersink all projecting setscrews; place railing around muck shears and place a hand rail for greaser up overhead walk.

No. 215—November 16. Braddick & Lineberry, Frankton: Cover or countersink all projecting setscrews; cover cogs on planer; post laws.

No. 216—November 16. Chicago Glass Co., Frankton: Secure affidavits from all boys under sixteen years of age and keep them on file in the office; pay in accordance with the weekly wage law, Chapter 134, Section 1.

No. 217—November 16. Frankton Lumber and Manufacturing Co., Frankton: Cover or countersink all projecting setscrews; provide guards for all rip saws, frizzers, and hand planer; provide hood for swinging cut-off saw; box band saw under table.

No. 219—November 16. Frankton Milling Co., Frankton: Place railings around stair openings in floor at second and third floors and hand rails on stairs; box in large belts where they come through first, second and third floors and chain belt on third floor; cover or countersink all protruding setscrews; place railing around large pulley wheel at engine; post laws.

No. 220—November 20. Lapel Flint Glass Co., Lapel: Discharge all boys under the age of fourteen and secure affidavits from all boys between fourteen and sixteen years of age and keep them where they can be examined by the Inspector.

No. 221—November 20. The Lapel Bottle Co., Lapel: Discharge all boys under the age of fourteen and secure affidavits from all boys between fourteen and sixteen years of age and keep them on file in the office where they can be examined by the Inspector.

No. 222—November 20. Woodward Brothers, Lapel: Place guard on rip saw and hood on swinging cutoff saw; post laws.

No. 223—November 20. Woodward Brothers, Lapel: Box in upright shaft on second floor of elevator; cover or countersink all protruding setscrews.

No. 224—November 20. Shetterly Brothers, Lapel: Cover or countersink all projecting setscrews; box in large belt where it comes through first and second floors; place railing around floor opening at second floor.

No. 225—November 20. N. C. Branson's Box Factory, Lapel: Place guard on rip saw; cover or countersink all projecting setscrews; cover cogs on planer; place railing along large belt at engine; pay in accordance with the weekly wage law, Chapter 134, Section 1; post laws.

EXHIBIT C.—Orders Issued—Continued.

No. 226—November 21. Wagner Glass Co., Ingalls: Have the affidavits for boys under sixteen years of age at factory office; cover or countersink all protruding setscrews; pay in accordance with the weekly wage law, Chapter 134, Section 1.

No. 227—November 21. The Ingalls Zinc Co., Ingalls: Cover or countersink all projecting setscrews; place railing around crusher; post laws.

No. 228—November 23. B. F. Boltz, Winchester: Cover or countersink all projecting setscrews; place guard on rip saw and rail in belts that run rip saw; place shield on swinging cutoff saw; post laws.

No. 229—November 23. Winchester Handle Co., Winchester: Cover or countersink all projecting setscrews; report accident that happened some time ago; post laws.

No. 231—November 23. A. Rice & Co., Winchester: Cover or countersink all projecting setscrews; post laws.

No. 233—November 23. D. L. Adams, Winchester: Place railing around belts and pulleys that run large saw. This is the second time this order has been issued. Should we find, upon our next visit, that the order has not been complied with, we shall be compelled to bring suit.

No. 235—November 24. Woodbury Glass Co., Parker: Provide clean watercloset and ground around it; have affidavits for all boys under sixteen years of age on file in the office.

No. 236—November 24. H. C. Vaught & Sons, Parker: Place guard on rip saw.

No. 237—November 24. Winchester Milling Co., Winchester: Place railing around flywheel at engine; box in large belt where it comes through first, second and third floors and chain belt on third floor; place railings around floor opening at second and third floors with hand rail on stairs; place railing around platform in engine-room; post laws.

No. 238—November 27. Brookville High School, Brookville: Place two fire escapes on this building, one on the south side at two middle windows on third floor, taking in same windows at second floor, with stairway to ground; the other on north side at two middle windows on third floor, taking in same windows at second floor, with stairway to ground.

No. 239—November 28. John Ferris & Sons, Brookville: Place guards on rip saws and frizzers; cover belts where they come through second floor.

No. 240—November 28. The A. M. Tucker Furniture Co., Brookville: Place guard on frizzer and hand rails on stairs; post laws.

No. 241—November 28. Midland Paper Mills, Brookville: Cover or countersink all projecting setscrews. Section 3 of same law prohibits females from working in manufacturing establishments between the hours of 10 p. m. and 6 a. m. The weekly wage law requires that you pay weekly.

EXHIBIT C.—ORDERS ISSUED—Continued.

No. 243—November 28. Fowler & Case, Brookville: Place railing along large belt that runs sawmill; cover or countersink all projecting setscrews; place guard on rip saw; post laws.

No. 244—November 28. P. T. McCanmon, Brookville: Place fire escape at second and third windows from east end on north side at third floor, taking in same windows at second floor, with drop ladder to ground.

No. 245—November 28. H. C. Kimble & Sons, Brookville: Cover or countersink all projecting setscrews; place hand rail on stairs; post laws.

No. 246—November 28. Dudley & Gettig, Brookville: Cover or countersink all projecting setscrews; place guard on rip saw and hood on swinging cutoff saw; post laws.

No. 247—November 28. "Daisy Roller Mills," Brookville: Cover or countersink all projecting setscrews; box in large belt where it comes through first and second floors; place railing around floor openings at second and third floors and hand rails on stairs; post laws.

No. 248—November 28. A. Fries & Sons, Brookville: Cover or countersink all projecting setscrews; post laws.

No. 250—November 29. G. W. Doner, Brookville: Place guard on rip saw and hood on swinging cutoff saw; post laws.

No. 251—November 29. Brookville Canning Co., Brookville: Provide separate waterclosets for girls; clean off the floors of factory and keep them in a good sanitary condition; pay in accordance with the weekly wage law; post laws.

No. 253—December 6. Hartford City Paper Co., Hartford City: Section 3 of Chapter 142 prohibits women from working between the hours of 10 p. m. and 6 a. m.

No. 255—December 6. Meredith & Croninger, Hartford City: Place railing along or cover belts on second floor; place railing around opening in second floor in machine room; cover or countersink all projecting setscrews; post laws.

No. 306—December 20. C. Rodenberg, Lawrenceburg: Inclose engine flywheel and belt with railing.

No. 308—December 20. James & Mayer Buggy Co., Lawrenceburg: Provide means of communication between engine-room and machine department; cover or countersink all projecting setscrews in collar on basement line shaft in saw room.

No. 314—Dcember 21. North Vernon Pump and Lumber Co., North Vernon: Cover or countersink all protruding setscrews in collar on countershaft, operating sand drum; one setscrew on shaft driving blower; place guard on jointer.

Sept. 26. Place guards on frizzer; clean scraps and shavings out of shop and keep it clean, and post laws.

No. 315—December 21. Cone & Jones, North Vernon: Condition of water-closet for mill employes is foul; provide new and have same properly screened.

Sept. 26. Cover or countersink all protruding setscrews.

No. 316—December 21. Litchfield Bros., North Vernon: Place portable cover over floor opening and main drive belt near idler pulley.

Sept. 26. Reduce speed of emery wheel and post laws.

No. 317—December 21. R. Leavitt, Vernon: Place guard on passageway side of equalizing saws on ground floor; also provide means for removal of shavings from floor, endangering the safety of employes in movements about machinery.

No. 318—December 21. J. H. Wagner & Co., Vernon: Make partition between rattler room and grind room tight; provide better means for the removal of dust from both grinding rooms.

No. 321—January 4. D'Heur & Swain Lumber Co., Seymour: Inclose with guard rail or cover over the floor opening; cover drive belt and rider pulley; cover or countersink all projecting setscrews in collars on line shaft, under mill.

Sept. 27. Place guards on rip saws and post laws.

EXHIBIT C.—Orders Issued—Continued.

No. 323—January 4. Progress Furniture Co., Seymour: Place guard before resaw on passageway side; try guard on shaper and on rip and cutoff saws. .

No. 324—January 4. Seymour Woolen Factory Co., Seymour: Place automatic gate (hinged to the floor, free at top and thirty inches high) at hoist shaft, third floor, as pointed out to Mr. Sneck; cover or countersink all protruding setscrews in collars on shafting, picker room, three in spinning room, southeast corner of building, and one in finishing room; secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

Sept. 26. Cover or countersink all protruding setscrews.

No. 326—January 4. Seymour Manufacturing Co., Seymour: Place guard on doorway side of equalizer saw, under shed.

Sept. 27. Connect lathes with blower to take dust and shavings away; place railing at engine.

No. 331—January 5. McCowen & McCowen, Salem: Place guard rail along drive belt from engine pulley to idler pulley on mill side, thirty inches high; cover or countersink all protruding setscrews in collars on shafting.

No. 332—January 5. W. R. Alexander, Salem: Steaming vat must be provided with guard rail on engine side, if vat is kept in present location.

No. 333—January 5. C. M. Crim, Salem: Place shield on rear side of swinging cutoff saw.

No. 334—January 5. Stout & Wilson Manufacturing Co., Salem: Cover or countersink all projecting setscrews in collars on shafting; try saw guard on rip and cutoff saws, as suggested; secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file in the office.

No. 339—January 16. Dr. H. A. Gobin, Greencastle: You are hereby notified to comply with Section 2, Chapter 207, by providing one outside fire escape on the building known as Science Hall; said fire escape to consist of iron balconies three feet wide, taking in one window, on west side of building, at end of corridor, taking in same window at second and third stories, with drop ladder from second story to ground.

No. 340—January 17. Dr. H. A. Gobin, Greencastle: In order that you, as president of De Pauw University, may comply with the law relating to means of egress from buildings used for school purposes or dormitories, it will be necessary for you 'o erect a stairway, at least three feet wide, leading from the roof of the one-story building to the roof of the two-story building of the kitchen on the building known as the Woman's Hall, so that the inmates of this building can escape by the window at east end of hall on third floor to roof of second story building and from thence by means of these stairs to the one-story

EXHIBIT C.—ORDERS ISSUED—Continued.

building near by. We think this the much better way than to order a fire escape on the side of your building, as is usually done in such cases.

No. 341—January 17. Greencastle Wood Manufacturing Co., Greencastle: Inclose rim shaper with metallic guard except on cutting side.

No. 342—January 17. Geo. E. Blake, Greencastle: In order that you may comply with the law relating to the safety of persons in buildings it will be necessary that you erect a fire escape on the rear of the building owned by you, known as the Opera House. This escape to be placed on the second and third windows from northwest corner of building on the west side of the stage. From this balcony construct an iron stairway, thirty-six inches wide, firmly anchored, and of sufficient strength to satisfy this department. Land same on roof of one-story brick stable below. Whoever you let the contract to for this work, have the contract so made that it shall not be paid for until accepted by this department, and have them submit a sketch and size of material to us. I ask this because this is a little out of the usual order of escapes.

No. 343—January 17. Alfred Hurt, Greencastle: In order that you, as owner of the Masonic Hall Building, and the Odd Fellows, who own their own room in the same building, may comply with the law, it will be necessary that there be erected on this building a fire escape in accordance with the specifications inclosed. We have located this escape at the window at the south end of the hall. This can be used jointly by both parties and should be erected by both. There should be a window cut in the rear room on the Masonic side, about opposite the door leading into the hall from the Odd Fellows' room, near the south end, so that the escape can be reached without going into the hall near the head of the stairs, so that if the stairway was cut off by fire or smoke from the second floor below they could make their exit by these doors. Should you prefer to extend the balcony so as to embrace the first window east of the hall window on the Masonic side, you could do so, as this would give them the same egress as from the hall window.

No. 346—January 18. Frankfort Hoop Co., Frankfort: Place guard before large swinging cutoff saw in sawmill; also place guard rail before engine pulley drive belt.

No. 348—January 18. H. A. Langton & Co., Frankfort: Cover or countersink setscrew in collar on shaft near floor, operating band saw, east end.

No. 351—January 19. Jesse Blinn, Frankfort: The proscenium or curtain-opening of all theaters shall have a fire-resisting curtain of some incombustible material, and such curtain shall be properly constructed and shall be operated by proper mechanism.

No. 352—January 19. Deming & Thompson Lumber Co., Frankfort: Place vertical guard before resaw on passageway side.

EXHIBIT C.—Orders Issued—Continued.

No. 354—January 30. Cleveland & Palmer, Frankfort: Place guard before equalizer saw next to sander belt. Also cover projecting setscrew in collar on countershafting operating sander belt.

No. 355—January 30. Frankfort Handle Manufacturing Co., Frankfort: Cover protruding setscrews in collars on countershaft, near floor, north side; also connect sander belts with exhaust fans.

No. 360—January 30. Gallway & Clark, Attica: Place guard rail before cutoff saw on boiler side.

No. 362. January 30. Attica Handle Co., Attica: Inclose engine drive belt and pulley with double guard rail on north side; cover projecting setscrews in collars where exposed.

No. 363—January 31. C. J. Johnson, Attica: Provide one outside fire escape on the building now used for lodge purposes, in the town of Attica, County of Fountain, and occupied by the Attica Lodge, No. 33, I. O. O. F., such fire escape to consist of iron balconies three feet wide, taking in second window from northeast corner of building at second and third stories, connecting said balconies by iron stairs, and provided with an iron drop ladder to lead from the balcony at second story to ground.

No. 364—January 31. Sterling Remedy Co., Attica: Provide one outside fire escape on the building now used for manufacturing purposes, in the city of Attica, County of Fountain, and occupied by the Sterling Remedy Co.; such fire escape to consist of iron balconies three feet wide, taking in first window from west end on south side, at second and third stories and connecting said balconies by iron stairs, and provided with an iron drop ladder to lead from balcony at second story to ground.

No. 366—January 30. Wabash Clay Co., Veedersburg: Place guard rails before crown wheels and pinions over dry pans, and cover projecting setscrews on pinion shaft and wherever else exposed on machines or shafting; guard all inward acting gears; inclose flywheel and belt in engine-room.

No. 370—January 30. W. F. Epperson, Ladoga: Cover or guard all exposed protruding setscrews in collars on line and counter shafting; where possible, place guards over table rip saws.

No. 371—January 30. Epperson & Steele, Ladoga: Enclose flywheel and belt with double guard rail about thirty-six inches high.

No. 372—January 30. Rapp & Lidica Buggy Co., Ladoga: Place guard rail around elevator floor opening.

No. 373—January 31. Frank Johnson, Roachdale: Place guard over rip saw; it is necessary that a practical boiler maker make an inspection of the boiler in your sawmill and that his report be submitted to this office.

No. 374—January 30. Greer Wilkinson Lumber Co., Roachdale: Place guard before resaw on exposed side. Place guards on jointer and on all table rip saws.

EXHIBIT C.—Orders Issued—Continued.

No. 375—January 30. Roachdale Novelty Wood Co., Roachdale: Inclose lower pulley of band saw and place guards over all table rip saws.

No. 376—January 30. Roachdale Handle Co., Roachdale: Place guards over two table saws, south end of building; inclose lower pulley of band saw, and cover all protruding setscrews in collars where exposed.

No. 377—January 30. Campbell & Smith, Lebanon: Place guard over jointer bit; also saw guards on saws, as suggested to Mr. Rogers, foreman.

No. 378—January 30. Lebanon Mfg. Co., Lebanon: Place guards over jointer and table rip saws; also place guard before resaw on exposed side.

No. 380—January 31. The Lebanon Novelty Works, Lebanon: Inclose elevator floor opening with self-lifting gates; cover or gaurd all protruding setscrews in collars on line and counter-shafting; place guards on all table saws.

No. 381—January 31. A. N. Holloway, Lebanon: Inclose engine drive pulley and belt with guard rail on engine side; place saw guards on all rip saws.

No. 382—January 31. A. H. Meyer, Lebanon: Place hand rail on stairway, west end of building; provide safety gates for elevator; cover all protruding setscrews in collars, where exposed, on line and counter-shafting place guards on all rip saws.

No. 383—January 31. J. W. Binell Co., Lebanon: Place guards on table saws and shapers; cover all protruding setscrews in collars on line and counter-shafting.

No. 384—January 30. C., C., C. & St. L. R. R. Car Shops, Indianapolis: Inclose lower pulley of band saw, in wood shop, with portable shield; adopt use of guards over shapers and table saws; provide better ventilation for removal of smoke and gases in smith shop.

No. 385—January 30. Standard Wheel Co., Indianapolis: Place a shield on rear of equalizing saws on first floor, west side of building, near door.

No. 387—February 6. Geo. Merritt Co., Indianapolis: Cover or countersink projecting setscrew in collar on reel, third floor, west end.

No. 388—February 7. The Beveridge Paper Co., Indianapolis: Place guard before flywheel at foot of stairway in basement.

No. 389—February 7. Albert Minter, Indianapolis: Place guard on exposed rear side of heading saw, a straight upright board properly secured at top and bottom.

No. 390—February 9. Fred W. Brant, Indianapolis: Place guards on rip saws.

No. 391—February 9. Enterprise Laundry, Indianapolis: Inclose extractor belts with portable box guard, 24 to 30 inches high.

EXHIBIT C.—Orders Issued—Continued.

No. 392—February 9. Aetna Cabinet Co., Indianapolis: Place guards on jointer and rip saws; elevator gates must not be tied or propped up.

No. 393—February 10. Hollinsbe Stone Co., Westport: Pay in accordance with the weekly wage law, Chapter 134, Section 1; secure affidavits from all minors between the ages of fourteen and sixteen years.

No. 394—February 10—Sand Creek Limestone Co., Westport: Pay in accordance with the weekly wage law, Chapter 134, Section 1; employ no boys under fourteen years of age and secure affidavits from all minors between the ages of fourteen and sixteen years.

No. 395—February 10. Westport Limestone Co., Westport: Pay in accordance with the weekly wage law, Chapter 134, Section 1; secure affidavits for all minors between the ages of fourteen and sixteen years.

No. 396—February 10. A. A. Magee, Westport: Pay in accordance with the weekly wage law, Chapter 134, Section 1; secure affidavits from parents in employing minors between the ages of fourteen and sixteen years.

No. 397—February 10. Academy of the Immaculate Conception: In engine room guard or cover under belt from engine to dynamo; in laundry, inclose extractor pulleys and belt on floor, 24 inches high; cover or countersink projecting setscrew in collar on line shaft in laundry, as suggested to house carpenter.

No. 398—February 12. Mrs. Anna C. Reaum, Indianapolis: Cover or countersink projecting setscrew in collar on line shaft in Hoosier Boy Wire Fence Machine Co.'s room.

No. 400—February 12. Armstrong Laundry, Indianapolis: Cover or countersink all projecting setscrews in collars on shafting; remove table obstructions from before window leading to fire escape.

No. 401—December 20. G. F. McFarren, Bluffton: Place fire escape at second window from west end of McFerren block at third floor on south side, taking in same window at second floor, with drop ladder to ground.

No. 402—December 20. E. Y. Sturgis, Bluffton: Place fire escape at first and second windows from west side of Sturgis block at third floor on south end, taking in same windows at second floor with drop ladder to ground.

No. 403—December 20. G. W. Grimes, Bluffton: Pay in accordance with the weekly wage law, Chapter 134, Section 1; post laws.

No. 404—December 20. Decatur Eggcase Co., Decatur: Cover or countersink all projecting setscrews; pay in accordance with the weekly wage law, Chapter 134, Section 1; post laws; Decatur Eggcase Co., department of eggcase fillers, provide separate waterclosets for girls.

EXHIBIT C.—Orders Issued—Continued.

No. 895—May 24. Converse Co-operative Glass Association, Converse: Place railing around gas engine and guard on rip saw; post laws.

No. 896—May 24. W. L. Sharp Glass Co., Converse: Place guard on rip saw and post laws.

No. 897—May 25. National Car Coupler Co., Converse: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; post laws.

No. 898—May 25. Converse Foundry and Machine Works, Converse: Cover or countersink all protruding setscrews and post laws.

No. 899—May 25. Timbrough Bros., Swayzee: Place guard on rip saw and hood on swinging cutoff saw; post laws.

No. 903—April 24. Union Trust Company, Indianapolis: Paint the fire escapes on the building occupied by H. P. Wasson & Co.

No. 906—April 28. Robt. Catterson, agt., Domestic Laundry, Indianapolis: Repair catch basin and allow no laundry water to escape into the cellar.

No. 907—April 28. Progress Laundry, Indianapolis: Provide better means of ventilation.

EXHIBIT C.—Orders Issued—Continued.

No. 909—May 1. Wm. Swanson, M. M. P., C., C. & St. L. Repair Shops, Indianapolis: Place guard on rip saw in west end of wood shop; inclose lower pulley of band saw, on front side only; cover gearing on one screw cutting lathe, the second machine coming from east to west near a south wall.

No. 910—May 1. Fred Ostermeyer, Indianapolis: Fire escape on the building occupied by the Smith, Day & Co. should be painted at once.

No. 912—May 1. C. F. Roeserman, Indianapolis: Place a shield or guard before overhead pulley at basement door entrance.

Mrs. Eva Heckman, Indianapolis: Provide better sewerage connection for laundry in No. 375 S. Illinois Street to prevent leakage of waste water in basement.

No. 918—May 8. B. & O. S. W. Ry. Shops, Washington: Place guards on table rip saws (two on first floor and one on second); place guard over jointer bits as suggested; place shield on east side of cutoff saw, first floor, as pointed out to foreman.

No. 922—May 8. L. H. Creager, Washington: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

No. 923—May 8. Hatfield & Palmer, Washington: Place guard on rip saw.

No. 926—May 9. Thompson & Co., Oakland City: Place a vertical shield or guard before exposed side of resaw; place guards on rip saws.

No. 927—May 9. Chas. Reed, Oakland City: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; employ no child under the age of fourteen years.

No. 928—May 9. Louisville, Evansville & St. Louis R. R. Co.'s Shops, Princeton: Place guards on rip saws and over jointer bits.

No. 929—May 9. A. B. Nickey & Sons, Princeton: Inclose bevel gear operating log jack under mill, north end.

No. 930—May 10. Wm. Reed, Princeton: Cover or inclose gear and pinion operating pug mill. Section 9 requires that all machinery be properly guarded.

No. 933—May 10. C. W. White Lumber Co., Princeton: Place guards on rip saw and over jointer bits.

No. 934—May 10. The Bachner Time Piece Co., Princeton: Place guard or shield over gear pinion of large power punch press and inclose large flywheel in engine-room.

No. 936—May 11. Decker Coil Hoop Co., Decker: Place a guard rail on east side of drive belt; cover or countersink all protruding setscrews in collars on shafting; cover shafting to prevent contact with in stepping over same; place P of safety valve so as to carry one hundred (100) pounds only.

EXHIBIT C.—Orders Issued—Continued.

No. 937—May 11. J. T. Jackson, Decker: Place a guard rail on north side of main drive belt. Section 2 provides that no child under the age of fourteen years shall be permitted to work in any factory. The cutoff saw with swinging rack must be otherwise arranged if its use is continued; would recommend a table and carriage.

No. 938—May 11. H. R. McIlvaine, Vincennes: Place guards on rip saws and over jointer bits.

No. 939—May 18. E. C. Atkins & Co., Indianapolis: Repair and make safe the north cable (double cable) of large elevator, in which many strands are broken; cover or countersink two protruding setscrews in collars on countershafts (about 20 inches from floor) propelling filing machines on fifth floor.

No. 941—May 18. Parry Manufacturing Co., Indianapolis: Provide guards over all jointer bits, and urge foreman to insist upon their use; inclose lower pulley of all band saws.

No. 943—May 21. Terre Haute Shovel and Tool Co., Terre Haute: Inclose gear on bending machines, second floor; provide hand rail along overhead plank walk for oiler.

No. 947—May 22. John P. Denning, Terre Haute: Set safety valve on boiler not to exceed ten pounds higher than average load of steam carried.

No. 949—May 22. Terre Haute Carriage and Buggy Co., Terre Haute: Place guard over jointer bits and on rip saw, as suggested.

No. 953—May 22. Wabash Cooperage Co., Terre Haute: Inclose engine flywheel on north side, front door entrance; secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

No. 954—May 22. Terre Haute Pressed Brick Co., Terre Haute: Cover or countersink all protruding setscrews in collars on shafting, under clay platform near pugmill.

No. 955—May 23. Fautz & Hunter Carriage Manufacturing Co., Terre Haute: Provide proper waterclosets and discontinue use of the present one in alley, exposed and unscreened.

No. 957—May 23. Mrs. Mary G. Roberts, Terre Haute: Place fire escape on east side of building occupied by Terre Haute Laundry and Dyeing Co., twenty-inch iron stairway from iron balcony, third floor, to wooden platform landing on level with second floor at head of present outside stairway—the balcony of third floor to embrace the fourth window from front of building. Your immediate attention is called to the unsafe condition of elevator cable; must not be used till replaced by new one. This order for fire escape was issued May 19, 1898; if not complied with within thirty (30) days, suit will be entered.

EXHIBIT C.—Orders Issued—Continued.

No. 958—May 22. Samuel Young, Terre Haute: The outside stairway off roof must be properly braced and steps repaired and made safe; should also be painted; place fire escape notices and alarm gong in hallway, capable of being heard throughout the house.

No. 962—May 23. Hunter Laundering and Dyeing Co., Terre Haute: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

No. 963—May 23. The United States Wrapper Co., Terre Haute: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; provide one more seat in girls' closet.

No. 964—May 24. National Biscuit Co., Terre Haute: Cover the exposed gear at danger point each side of new mixers.

No. 966—May 24. L. B. Root & Co., Terre Haute: Discharge all boys under the age of fourteen years; secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

Dennis Deming, Terre Haute: Your attention is called to the fire escape on the building occupied by the L. B. Root Co. It should at once be treated with a heavy coat of antirust paint to prevent further corrosion; this is advisory and is only made to call your attention to the condition of the escape.

No. 968—May 24. Stahl, Urban & Co., Terre Haute: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; provide four more seats in the closet used by your female employes, so you may have one seat for each twenty-five persons.

No. 969—May 24. Surbaugh Drill and Tool Co., Terre Haute: Cover danger point of gear on large power press, east end of shop; reduce speed of emery wheel to not to exceed 1,500 revolutions per minute with present guard, and without guard to 1,200 revolutions.

No. 972—May 24. Ehrmann Manufacturing Co., Terre Haute: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

No. 973—May 25. A. B. Mewhinney & Co., Terre Haute: Place guard rail before flywheel in engine-room; cover or countersink all protruding setscrews in collars on line and counter shafting; place a self-lifting and closing gate, as suggested, on third floor to elevator entrance; provide additional means of exit from third floor by cutting doorway through east end wall on to the two-story roof; from said roof place a twenty-four-inch (wide) iron drop ladder to connect with present wooden platform and stairway to ground.

No. 976—May 25. A. Dale Houff, Terre Haute: Place guard on rip saw.

No. 979—May 26. W. H. Albrecht, Terre Haute: Provide separate water-closet accommodations for employes at No. 822 Main St., building occupied by John Hanley.

EXHIBIT C.—Orders Issued—Continued.

No. 980—May 28. H. A. Langton & Co., Terre Haute: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; reduce steam pressure on boiler to ninety pounds maximum, as per Hartford Steam Boiler Ins. Co.'s inspection of May 20, 1900.

No. 983—May 28. Up To Date Manufacturing Co., Terre Haute: Place a safeguard before intersecting gear and pinion on large power press.

No. 984—May 28. Vandalia Railroad Co. Repair Shops, Terre Haute: Keep covered the unused portions of jointer bits; where impracticable to use saw guard on rip saws, provide them with dividers; provide a suitable inclosed retreat for swinging cut-off saw.

No. 985—May 28. Mrs. Seaman, Terre Haute: Provide closet for use of female employes, as required by law, one seat for each twenty-five (25) employes.

No. 986—May 29. Kester Electric Co., Terre Haute: Reduce speed of emery wheel to not to exceed 1,500 revolutions; otherwise adopt use of safety collars or surround wheel with heavy metallic shield.

No. 988—May 29. E. S. Mace, Terre Haute: Inclose drive belt and pulley of small engine; cover or countersink all protruding setscrews; inclose more completely swing cut off saw by building above and forward of saw on east side; place guard on rip saw.

No. 990—May 29. American Car and Foundry Co., Terre Haute: Place hood shield over brace cutter saw, and if possible inclose retreat for cut off saw at doorway, west side wood shop.

No. 991—May 29. The N. C. Kintz Planing Mills, Terre Haute: Cover or countersink all protruding setscrews in collars on shafting; place guards over jointer bits and on rip saw.

No. 993—May 31. Central Manufacturing Co., Terre Haute: Place "P" guard over jointer bits and guard on rip saw; place a self-lifting and closing gate to top floor of elevator entrance.

No. 994—May 31. Kleeman Dry Goods Co., Terre Haute: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

No. 996—May 31. W. H. Albrecht & Co., Terre Haute: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; place safety gates on each floor opening to freight elevator; you are also cautioned against shutting off water pressure over night from cylinder operating elevator; the possibility of a serious accident may thus be averted.

No. 997—June 1. Terre Haute Brick and Pipe Co., Terre Haute: Place guard rail on south side of flywheel from engine to wall in engine-room; cover gear and pinion on pugmill, second floor; inclose bevel gear over head of feeder on brick press, first floor.

EXHIBIT C.—Orders Issued—Continued.

No. 999—June 1. Mrs. B. Hegarty, Cigar Factory, Terre Haute: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

No. 1000—June 5. Consumers Paper Co., Muncie: Place hand rails on all overhead walks; place a valve in main steam pipe after it leaves the boilers so steam can be shut off from all parts of the mill.

No. 1001. June 5. Muncie Wood Working Co., Muncie: Place guards on all rip saws and post laws.

No. 1002—June 5. Enterprise Stove Co., Muncie: Place railing around engine and post laws.

No. 1003—June 5. Ontario Silver Co., Muncie: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; post laws.

No. 1004—June 11. Republic Iron and Steel Co., Brazil: Cover or countersink all protruding setscrews and post laws.

No. 1005—June 11. Brazil Foundry and Machine Shop, Brazil: Reduce speed of emery wheel to 1,900 revolutions per minute; post laws.

No. 1006—June 12. Reed & Sons, Brazil: Place guards on rip saw and frizzer; box band saw under table, and post laws.

No. 1007—June 12. J. N. Halstead, Brazil: Place railing around pulley wheel at engine and post laws.

No. 1008—June 12. C. E. Wilder, Brazil: Place guard on jointer or hand planer; box band saw under table and post laws.

No. 1010—June 12. Chicago Sewer Pipe Co., Brazil: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file, and post laws.

No. 1011—June 12. Indiana Paving Brick and Block Co., Brazil: Cover or countersink all protruding setscrews; place railing around flywheel at engine, and post laws.

No. 1012—June 12. Thomas Smith, Brazil: Place fire escape on south end of Opera House Block, taking in third and fourth windows from east side and taking in same windows at second floor with drop ladder to ground.

No. 1013—June 12. George Andrews, Brazil: Place fire escape on north end of Shannon Block, top balcony to take in the first window from west side of corridor in the Masonic Hall and the first window from east side of corridor in the I. O. O. F. Hall, second balcony taking in same windows at second floor, with drop ladder to ground.

No. 1014—June 12. American Clay Manufacturing Co., Brazil: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; place railing around flywheel at engine, and post laws.

No. 1017—June 13. Sheridan Brick Works, Brazil: Make safe the brick wall in front of boilers; cover or countersink all protruding setscrews; place railing around engine; cut off all protruding keys, and post laws.

EXHIBIT C.—Orders Issued—Continued.

No. 1018—June 13. The Excelsior Clay Works, Brazil: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file, and post laws.

No. 1019—June 13. Weaver Clay and Coal Co., Brazil: Place railing around elevator shaft at second floor and post laws.

No. 1020—June 15. Muncie Foundry and Machine Works, Muncie: Cover or countersink all protruding setscrews and place guard on hand planer.

No. 1024—June 19. Louis Fox, Ft. Wayne: Place fire escape on building occupied by A. Hirsh & Co., on south side in street at second window from west end of building, taking in same windows at second floor, with drop ladder to ground; post laws.

No. 1025—June 19. Thomas Lau, Ft. Wayne: Place a regular stairway fire escape on south side of Lau Building where present straight ladder escape now is.

No. 1026—June 19. S. R. Taylor: Place fire escape on north end of Elektron Block at fifth and sixth windows from east side, taking in same windows at fourth, third and second floors, with drop ladder to ground; place older boy in charge of elevator.

No. 1027—June 19. M. C. McDougal, Ft. Wayne: Place fire escape on south side of McDougal Block at second window from east end, taking in same window at third and second floors, with drop ladder to ground and ladder to roof.

No. 1028—June 19. Hoosier Manufacturing Co., Ft. Wayne: Place regular stairway fire escape on east side of this building where present straight ladder escape now is.

No. 1029—June 19. Allen County Building and Loan Association, Fort Wayne: Place fire escape on east side of this building at second window from north end, taking in same window at second floor with drop ladder to ground.

No. 1030—June 20. The Wayne Baking Co., Ft. Wayne: Keep the floors of factory clean; make racks for flour to lay on to keep it off the floor; post laws.

No. 1031—June 20. A. L. Johnes & Co., Ft. Wayne: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; keep windows leading to fire escape clear so they could be used at a moment's notice; post laws.

No. 1033—June 20. Ft. Wayne Paper Box Factory, Ft. Wayne: Provide separate water closets for girls and post laws.

No. 1036—June 20. E. Gilmartin, Ft. Wayne: Place guard on ripsaw and jointer; place hood on swinnging cutoff saw; box band saw under table; cover or countersink all protruding setscrews and post laws.

No. 1037—June 21. Kerr, Murray Manufacturing Co., Ft. Wayne: Place bars at elevator shafts; place railing around flywheel at engine and around platform leading to elevator.

EXHIBIT C.—Orders Issued—Continued.

No. 1038—June 21. Olds Wagon Works, Ft. Wayne: Connect all sand belts with blower; cover or countersink all protruding set-screws; place guards on all rip saws; cover belt at spoke saw where boy stands taking spokes off, and secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

No. 1039—June 21. Rhinesmith & Simonson, Ft. Wayne: Place guards on all rip saws and box band saw under table.

No. 1040—June 21. The Anthony Wayne Manufacturing Co., Ft. Wayne: Box band saw under table.

No. 1044—June 21. Indiana Road Machine Co., Ft. Wayne: Cover or countersink all protruding setscrews; place railing along fly-wheel at engine, and report all accidents to this office.

No. 1045—June 26. Bass Foundry and Machine Works, Ft. Wayne: Place hand rails on all overhead walks, and post laws.

No. 1046—June 26. The Western Gas Construction Co., Ft. Wayne: Place guard on rip saw and hand planer; cover rattlers in foundry and post laws.

No. 1047—June 26. S. F. Bowser & Co., Ft. Wayne: Place guards on hand planer and frizzer; box band saw under table, and post laws.

No. 1048—June 26. C. M. Menefee, Ft. Wayne: Cover rattlers in foundry, and post laws.

No. 1049—June 27. Hoffman Bros., Ft. Wayne: Place guards on all rip saws.

No. 1053—June 27. M. Tagmeyer, Ft. Wayne: Place guard on rip saw, and post laws.

No. 1057—June 28. D. N. Foster, Ft. Wayne: Provide separate water closets for men and girls and have them closer to the factory than the old ones are.

No. 1059—June 28. Kilian Baker, Ft. Wayne: Place guard on rip saw, and post laws.

No. 1061—June 28. Ft. Wayne Foundry and Machine Co., Ft. Wayne: Place railing around gas engine, and post laws.

No. 1062—June 28. The Peters Box and Lumber Co., Ft. Wayne: Place railing around engine; box band saw under table, and post laws.

No. 1064—June 28. Louis Rastetter & Son, Ft. Wayne: Box band saw under table.

No. 1065—June 28. Ft. Wayne Electric Works, Ft. Wayne: Place guard on rip saw, and post laws.

No. 1066—June 28. Wabash Railroad Shops, Ft. Wayne: Place guard on rip saw; box band saw under table, and post laws.

No. 1067—June 29. D. N. Foster, Ft. Wayne: Place fire escape on north end of Aldine Block at the first window from east side of dining-room, taking in same window at second floor, with drop ladder to ground.

No. 1068—July 6. Crampton Tuhey Canning Co., Muncie: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; post all laws and fill out blanks.

EXHIBIT C.—Orders Issued—Continued.

No. 1069—July 6. Franklin Lumber Co., Muncie: Place railing along wheel at engine; place guard on rip saw, and post laws.

No. 1071—July 6. B. W. Bennett, Muncie: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; place railing around engine, and post laws.

No. 1073—July 9. The Paul Manufacturing Co., Ft. Wayne: Place guards on rip saw and planer, and cover or countersink all protruding setscrews.

No. 1074—July 9. L. E. & W. R. R. Co., Ft. Wayne: Place guard on rip saw.

No. 1076—July 9. Bash Packing Co., Ft. Wayne: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; post laws.

No. 1077—July 9. Withington Handle Co., Ft. Wayne: Place guards on all rip saws and post laws.

No. 1078—July 9. Hilker Bros., Ft. Wayne: Place railing along both sides of belts at engine; place guards on rip saws, and post laws.

No. 1083—July 10. Empire Cigar Box Factory, Ft. Wayne: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; post laws.

No. 1084—July 10. The Packard Co., Ft. Wayne: Place hoods on all swinging cutoff saws; place railing along drivewheel at engine, and post laws.

No. 1085—July 10. Ft. Wayne Spoke Co., Ft. Wayne: Place railing around large pulley wheel at engine; replace swinging rack with table at hub saw; connect spoke lathes with blower to remove dust and shavings; post laws.

No. 1086—July 11. Ft. Wayne Lumber Co., Ft. Wayne: Place guards on rip saws, jointer and frizzer; box band saw under table, and post laws.

No. 1087—July 11. Smith & Randal Lumber Co., Ft. Wayne: Place guard on rip saw and hood on swinging cutoff saw; run railing along belt from engine, and post laws.

No. 1090—July 11. R. L. Romey, Ft. Wayne: Provide water closet for girls in building occupied by the Banner Laundry Co.
Banner Laundry Co., Ft. Wayne: Place railing around belt at wringer, and post laws.

No. 1093—July 12. Jacob Kleet & Son, Ft. Wayne: Place guards on rip saw and frizzer and box band saw under table.

No. 1094—July 12. National Biscuit Co., Ft. Wayne: Cover or countersink all protruding setscrews and cogwheels; place railing around pulley wheel at engine; place railing at foot of fire escape on roof of engine-room with post at outer rail of escape; keep windows leading to fire escape clear; provide one more seat in water closet for girls; post laws.

EXHIBIT C.—Orders Issued—Continued.

No. 1096—July 16. Broderick & Quinlain, Montpelier: Box in flywheel on large punch; place shields at all cogwheels, and post laws.

No. 1097—July 16. M. D. Hartzell, Montpelier: Place guard on rip saw and hood on swinging cutoff saw, and post laws.

No. 1100—June 6. Southwestern Furniture Co., Tell City: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; place a fire escape on north side of building, balcony embracing first window from west end of upper floor extending to second floor level and to ground by drop ladder. For the present a straight ladder with balcony at windows will be sufficient. This may be made of wood but must be well made.

No. 1101—June 6. Tell City Woolen Mills, Tell City: Anchor firmly in front of roof window a good, substantial ladder, lower end resting on roof below.

No. 1102—June 6. John Obrecht & Sons, Tell City: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; reduce speed of emery wheel not to exceed 1,500 revolutions and continue use of present guard.

No. 1103—June 6. Chair Makers' Union, Tell City: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

No. 1104—June 6. Boehmann & Ladwig, Tell City: Cover or countersink all protruding setscrews in collars on shafting.

No. 1105—June 6. Cabinet Makers' Union, Tell City: Place "P" guard over jointer bits.

No. 1106—June 7. Tell City Desk Co., Tell City: Place a board shield from floor to four inches above, on passageway side of resaw; place an alarm whistle on boiler, to be connected with machinery department by wire pull for use as signal to engineer in case of accident.

No. 1111—June 7. Fred and John Kreisle, Tell City: Place "P" guard over jointer bits in planing mill; provide a safe retreat for swing cutoff saw, as suggested in hub department. Considering age of boiler and the high pressure of load allowed or required, an inspection by a competent boilermaker is recommended. This latter order in regard to boiler inspection is advisory and is only made to call your attention to the condition of the boiler.

No. 1113—June 8. The Fischer Chair Co., Tell City: For better results from exhaust fan reverse motion of fan. Would be pleased to hear from you in regard to the effect this change may make.

No. 1114—June 8. Hermann Bros. & Co., Tell City: Place self-lifting gate on upper floor, as suggested; place electric bell, steam whistle, or alarm gong in engine-room and extend wire pull to machinery-room.

No. 1115—June 8. Tell City Furniture Co., Tell City: Place an automatic lift gate for top floor instead of present door to elevator.

EXHIBIT C.—Orders Issued—Continued.

No. 1116—June 8. Tell City Spoke Co., Tell City: Cover or countersink all protruding setscrews in collars on south end of feed screw of each spoke lathe; reduce speed of emery wheel not to exceed 1,500 revolutions per minute.

No. 1120—June 9. Cannelton Chair Co., Cannelton: Place guard rail along engine belt; cover or countersink all protruding setscrews in collar on shafting; secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

No. 1122—June 11. Western School Supply Co., Rockport: Place guards on rip saws; place "P" guard over jointer bits; cover or countersink the remaining protruding setscrews in collars; reduce speed of emery wheel not to exceed 1,500 revolutions, or adopt use of safety collars; remove belt shifter from under table of rip saw (first floor), and connect with vertical lever from above and rear of table, as suggested.

No. 1125—June 11. Southern Straw Board Co., Rockport: Place a guard rail from line shaft to each beater by side of two long beater pulley belts; cover or countersink two protruding setscrews in collars on counter shaft about twelve feet from engine near floor in machine-room.

No. 1126—June 11. Rockport Box Manufacturing Co., Rockport: Place guard over jointer bits, as suggested.

No. 1127—June 11. C. Pfeifer & Son, Rockport: Reduce speed of emery wheel not to exceed 1,500 revolutions for ten (10) inch wheel, and set safety valve on boiler to within ten pounds of average load on boiler.

No. 1131—June 12. R. D. Richardson, Evansville: Repair or replace elevator cable in building occupied by Goodwin Clothing Co. Provide one seat in closets for each twenty-five (25) persons. You have 179 females and only six seats.

No. 1132—June 13. George L. Mesker, Evansville: Reduce speed of emery wheel to 1,000 revolutions or adopt use of safety collars; place guards on rip saws and cover bevel gear operating rattler.

No. 1134—June 13. Stoltz Schmit Furniture Co., Evansville: Replace elevator cable, as it is unsafe; secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

No. 1136—June 13. Cottage Building Co., Evansville: Place a self-lifting gate at second floor elevator entrance; place guards on rip saws and over jointer bits.

No. 1138—June 13. Evansville Folding Bed Co., Evansville: Place signal bell or gong in engine-room and connect with machine or workroom with wire pull.

No. 1143—June 14. The Heilman Machine Works, Evansville: Place self-lifting gate to elevator entrance on third floor and some means of inclosure to same elevator hole on second floor.

EXHIBIT C.—Orders Issued—Continued.

No. 1147—June 15. Standard Chair Company, Evansville: Cover or countersink all protruding setscrews in collars on shafting or machinery; provide safety gates to elevator, as suggested; in engine-room place means of alarm that may be operated for signal from machinery department; secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

No. 1148—June 15. Single Center Spring Co., Evansville: Place guard over jointer bits; inclose lower pulley of band saw; provide some secure gate or bars to elevator floor openings on second, third and fourth floors.

No. 1149—June 15. Pearl Steam Laundry, Evansville: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

Mrs. Anna Breneke, Evansville: Provide separate water closets for males and females in building occupied by the Pearl Steam Laundry.

No. 1150—June 16. Bernardin Bottle Cap Co., Evansville: Place self-lifting gate at elevator entrance, second floor; repair or replace elevator cable; secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

No. 1153—June 18. Novelty Furniture Co., Evansville: Place guards on rip saws and shield over jointer bits, as suggested; provide safety elevator gates or bars to elevator well hole, each floor; secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

No. 1158—June 19. C. P. Wack & Co., Evansville: Place self-lifting gate at third floor elevator opening.

No. 1160—June 19. Wm. H. Schnute & Co., Evansville: Place guard on rip saw (edger) on first floor and at least a splitter on rip saw on second floor. Would advise a 14 to 18-inch board placed on boiler side of resaw from floor to three inches above top of saw.

No. 1161—June 20. Evansville Furniture Co., Evansville: Cover or countersink all protruding setscrews in collar on automatic mortice machine, first floor; repair or replace hand power elevator cable in shipping department.

No. 1168—June 21. Evansville Stove Works, Evansville: Provide some means for the removal of dust from cleaner or rattler-room, either by inclosing rattlers or connecting same and cleaner table with exhaust fans.

No. 1169—June 21. Karges Furniture Co., Evansville: Place guard over jointer bits, as suggested; cover or countersink the remaining setscrews in collars throughout the factory.

No. 1669—October 26. Indiana Pulp and Paper Co., Marion: Cover or or countersink all protruding setscrews.

No. 1671—October 27. Marion Paper Box Co., Marion: Cover or countersink all protruding setscrews.

EXHIBIT C.—Orders Issued—Continued.

No. 1673—October 27. Marion Planing Mill Co., Marion: Place guards on rip saws, planers and frizzers; box band saw under table; cover or countersink all protruding setscrews, and post law.

No. 1675—October 27. Barley & Spencer, Marion: Place hood on swinging cutoff saw in sawmill and cover main belt where the sawyer stands and steps over it, and place guard on rip saw in planing mill.

No. 1677—October 29. Barnard Bros., Marion: Secure affidavit from minor between the age of fourteen and sixteen and keep it on file.

No. 1678—October 29. B. G. Ackerman, Marion: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; cover or countersink all protruding setscrews; place hood on swinging cutoff saw, and post laws.

No. 1680—October 29. Western Strawboard Co., Gas City: Repair floor in beater-room.

No. 1682—October 29. United States Glass Co., Gas City: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; cover or countersink all protruding setscrews; place railing at flywheel of engine.

No. 1684—October 29. American Tin Plate Co., Gas City: Place railing around all shears and cover or countersink all protruding setscrews.

No. 1685—October 30. Thompson Bottle Co., Gas City: Discharge all minors under the age of fourteen years and secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

No. 1686—October 30. Sheldon Foster Glass Co., Gas City: Fill out and post new blanks which we will mail you.

No. 1687—October 30. Gas City Pottery, Gas City: Cover or countersink all protruding setscrews.

No. 1688—October 30. Zombro Box Co., Gas City: Cover or countersink all protruding setscrews; place guards on edging saw and planer, and post laws.

No. 1689—October 19. American Tin Plate Co., Elwood: Cover or countersink all protruding setscrews; place guard on rip saw and box band saw under table.

No. 1690—October 19. Elwood Iron Works, Elwood: Cover or countersink all protruding setscrews and place guard on rip saw.

No. 1691—October 19. Indiana Box Factory, Elwood: Cover all shafting near floor where men step over it; cover or countersink all protruding setscrews, and secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

No. 1692—October 19. Wright Shovel Co., Elwood: Place hand rails on all overhead walks.

No. 1693—October 19. McKenzie & Co., Elwood: Place guards on rip saw, planer and frizzer; report all accidents to this office, and post laws.

EXHIBIT C.—Orders Issued—Continued.

No. 1697—October 19. W. R. McCloy, Elwood: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

No. 1698—October 19. Elwood Planing Mill Co., Elwood: Place guards on rip saws, planers and frizzers; box band saw under table; place hood on swinging cutoff saw, and cover shafting in saw mill where men step over it.

No. 1699—October 19. J. F. Rodifer, Elwood: Cover or countersink all protruding setscrews; place railing around dry grinder; provide a new water closet, and post laws.

No. 1704—September 27. C. G. Conn Manufacturing Co., Elkhart: Inclose under pulley of band saw; and place guards over all rip saws.

No. 1708—September 27. The Consolidated Paper Bag Co., Elkhart: Cover crown wheel and pinions, east end, beater room; and inclose flywheel of large engine in machine room.

No. 1711—September 27. Elkhart Lumber & Planing Mill Co., Elkhart: Place guard over jointer, as suggested to Mr. Hill.

No. 1714—September 28. Garden City Stationery Co., Elkhart: Provide new elevator cable in stock room.

No. 1715—September 28. Acme Cycle Co., Elkhart: Cover or countersink two protruding setscrews, one on each end line shaft, third floor; and provide self-lifting gate to third floor elevator floor opening.

No. 1722—September 29. Perkins Wind Mill & Axe Co., Mishawaka: Place "P" guard over jointer bits, as suggested; cover power gear on bending machine in smith shop; and place a shield over rattler gear in basement.

No. 1725—October 10. Rochester Shoe Co., Rochester: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; post laws.

No. 1728—October 10. Myers & Bailey, Rochester: Place guards on rip saws and "P" guard over jointer bits; provide shield on passageway side of resaw, as suggested; and reduce load on boiler to 70 pounds maximum pressure.

No. 1729—October 10. S. A. Barkdoll, Rochester: Place guards on rip saws.

No. 1732—October 10. J. M. Davis, Rochester: Place fire escape on south side of Masonic Hall, upper balcony embracing second window from southeast corner on third floor, taking in window at second floor, with drop ladder to ground.

No. 1734—October 11. M. A. Baker, Rochester: Provide iron balcony on I. O. O. F. Hall, embracing doorway at west end of building on third floor and iron stairway not less than eighteen inches wide from said balcony to a balcony landing on level with second story floor and thence to sidewalk by iron drop ladder; the above balconies and stairway to be placed where present unsafe wooden platform and stairway now is.

EXHIBIT C.—Orders Issued—Continued.

No. 1735—October 11. L. M. Brackett, Rochester: Place fire escape on K. of P. Hall, upper balcony, embracing two first windows from southeast corner on third floor, taking in same windows at second floor, with drop ladder to ground.

No. 1738—October 11. J. F. Langenbaugh, Plymouth: Place fire escape on west side of Masonic Lodge hall near southwest corner, upper balcony, embracing first window from southwest corner, taking in window at second floor, with drop ladder to ground.

No. 1739—October 11. Chas. Andrews, Commander, Plymouth: Place fire escape on G. A. R. Hall at east end of building, upper balcony, embracing northeast window on third floor, taking in window at second floor, with drop ladder to ground.

No. 1740—October 11. The Plymouth Novelty Co., Plymouth: Place guards on rip saws and over jointer bits.

No. 1741—October 11. Clizbe Bros. Manufacturing Co., Plymouth: Provide safety gates to all elevator floor openings; secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

No. 1742—October 11. The Edgerton Manufacturing Co., Plymouth: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; cover or countersink all protruding setscrews on low machines and shafting.

No. 1743—October 12. C. L. Morris, Plymouth: Place guards on all rip saws.

No. 1744—October 12. Henry Humrichhouser, Plymouth: Place fire escape on K. of P. Hall on east end, upper balcony, embracing window on third floor, northeast corner of building, taking in window at second floor, with drop ladder to ground.

No. 1745—October 12. Nappanee Carriage Co., Nappanee: Provide safety gates to all floor openings to elevator.

No. 1746—October 12. Nappanee Furniture Co., Nappanee: Cover or countersink all protruding setscrews in collars on line and counter shafting or machinery; place guards on rip saws and over jointer bits, and provide new cable for elevator in factory building.

No. 1747—October 12. Creamery Package Manufacturing Co., Nappanee: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; provide upright shield on west side of resaw, four inches higher than top of saw; and place guards on rip saws.

No. 1750—October 12. Coppes Bros. & Zook, Box Fatcory, Nappanee: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; inclose engine crank and flywheel in engine room; provide upright shield to resaw on wall side next to work bench; inclose lower pulley of band saws and cover or countersink all protruding setscrews in collars on sander near head of stairs, second floor.

EXHIBIT C.—Orders Issued—Continued.

No. 1751—October 12. Nappanee Steam Laundry, Nappanee: Repair safety valve on boiler and set point of escape not to exceed ten pounds above working load.

No. 1752—October 13. Geo. L. Lamb, Nappanee: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; discharge boy under fourteen years of age; and place guards on rip saws.

No. 1754—October 13. Stoops & Coppes, Nappanee: Provide fire resisting curtain for proscenium in your auditorium.

No. 1755—October 14. The Kamme-Schellinger Brewing Co., Mishawaka: Cover or countersink all protruding setscrews in collars on line and counter shafting.

No. 1756—October 14. The American Malt Cream Co., Mishawaka: Provide new elevator cable.

No. 1757—October 14. Mishawaka Woolen Manufacturing Co., Mishawaka: Provide shields for exposed gear on two rubber wash mills and one calender machine, as pointed out to Supt. Eberhart; provide hand rails on each side of new cross bridge-roof with safe and easy access to said roof from fourth story floor.

No. 1758—October 15. Roper Furniture Co., Mishawaka: Discharge all minors under fourteen years of age; secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; provide new cable for north end elevator; place guards on rip saws and over jointer bits.

No. 1763—October 17. A. C. Staley Manufacturing Co., South Bend: Extend discharge spout of wool duster fifteen (15) inches; and report all accidents to this office.

No. 1764—October 17. South Bend Electric Co., South Bend: Provide guard rails along all dynamo belts on south side of line shaft and hand rails on each side of steps crossing line-shaft.

No. 1766—October 18. South Bend Woolen Co., South Bend: Provide metallic shield over gearing on two gig machines in basement and protect small elevator well hole with safety gate or bar.

No. 1769—October 18. The Bissell Chilled Plow Co., South Bend: Place guard rail full length of large belt between two power pulleys in pulp mill.

No. 1773—October 18. Clem Studebaker, South Bend: Provide safety gate to elevator entrance in mattress factory and make operating mechanism accessible from front approach.

No. 1776—October 19. Birdsell Manufacturing Co., South Bend: Provide exhaust fan and connect it with (two machines) automatic wheel sanders for removal of dust and fine shavings in No. 5 building, third floor.

EXHIBIT C.—ORDERS ISSUED—Continued.

No. 1777—October 19. South Bend Toy Manufacturing Co., South Bend: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file. Your attention is specially called to that part of said section which forbids the employment of young persons under sixteen "who can not read and write simple sentences in the English language," except during vacation of public schools.

No 1778—October 19. The Miller-Knoblock Electrical Manufacturing Co., South Bend: Provide guard over jointer bits, as suggested.

No. 1780—October 20. Sandage Steel Skein Co., South Bend: Provide platform along line shaft in grinding room and inclose rattlers in tight boxes; connect emery grinders in grinding room with exhaust fans; and place guards on rip saws.

No. 1781—October 20. Boyd & Hodson, South Bend: Place shield on west side of resaw, three inches higher than top of saw; and place guard on rip saws and over jointer bits.

No. 1782—October 20. The Malleable Steel Range Manufacturing Co.: Provide exhaust fan and connect it with buffing and emery wheel in grinding department for the removal of dust.

No. 1783—October 22. Indiana Lumber and Manufacturing Co., South Bend: Inclose lower pulley of band saw.

No. 1784—October 22. Stephens Manufacturing Co., South Bend: Attach splitter to self-feed rip saw table, and report all accidents to this office.

No. 1786—October 22. Folding Paper Box Co., South Bend: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

No. 1789—October 22. South Bend Dowel Works, South Bend: Report all accidents to this office.

No. 1790—October 23. Temple & Ellis, South Bend: Discharge all boys under the age of fourteen years and secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

No. 1791—October 23. McErlain & Elbel, South Bend: Discharge all minors under the age of fourteen years and secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; place guards on rip saws.

No. 1793—October 23. Mishler, Penrod & Abbot, South Bend: Place guard on rip saw in planer room.

No. 1795—October 23. Wilson Bros., South Bend: Discharge all minors under the age of fourteen years and secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

No. 1800—October 24. South Bend Chilled Plow Co., South Bend: Cover or countersink all protruding setscrews in collars on grindstone, buffing and emery wheel arbors.

EXHIBIT C.—Orders Issued—Continued.

No. 1801—May 8. Greenwood Screen Door Co., Greenwood: Place "P" of safety valve where valve will raise for steam to escape at 90 pounds; make attachment to lever so engineer can try it frequently; place shield on band saw under the table; use guard on shaper; and keep sawdust and debris from under feet of workmen.

No. 1802—October. Noblesville Bottle Co., Noblesville: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; fill out all blanks and post laws; cease fining employes.

No. 1803—October. American Straw Board Co., Noblesville: Cover or countersink all protruding setscrews and place railings around all engines.

No. 1804—October. The McElwain-Richards Co., Noblesville: Cover or countersink all protruding setscrews and post laws.

No. 1805—October. The American Carbon Works, Noblesville: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; fill out all blanks and post laws.

No. 1806—July 20. A. T. Vreeland, Michigan City: Place three escapes on the Vreeland Hotel; one on the north end in alley, taking in window of hall on each floor except first; one at southeast windows of south end, one window of each floor except first; place balcony at roof of second story part, east side, with balcony at top of first story, with drop ladder to ground; place stairs from hall window, southeast wing, to second story roof below, as well as stairs from roof of northeast wing to same roof; stairs to roof may be of wood, fire escapes according to specifications except that balcony at roof of second story part may be less than nine feet, so it is sufficient for starting landing.

No. 1807—September 24. E. G. Machan: Provide fire escape on public school building, upper balcony, embracing double windows on third floor, east side, three-foot stairway extending around corner of building to balcony on level with second story and from thence down by stairway to ground.

No. 1808—October. J. T. Polk, Greenwood: Cover or countersink all protruding setscrews; secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; fill out all blanks, and post laws.

No. 1902—October 24. The Singer Manufacturing Co., Foundry Department, South Bend: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; during term of school employ no young person who can not read and write the English language.

EXHIBIT C.—Orders Issued—Continued.

No. 1904—October 25. The Studebaker Bros. Manufacturing Co., South Bend: Close passageway between bulldozer and post, in No. 33, first floor, or guard machine on post side; and cover or countersink all protruding setscrews in collars, in No. 6, second floor.

No. 1905—October 25. Slicks St. Jo Steam Laundry, South Bend: Provide safety gate for elevator floor opening and inclose sides with guard rail.

No. 1909—October 26. Logansport Electric Light Co., Logansport: Inclose three large flywheels with guard rail extending to dynamo on one side each belt, viz., first and fourth engines from front of building.

No. 1910—October 26. Thompson Lumber Co., Logansport: Place guard over jointer bit, as suggested to Mr. Neff, and guard on rip saw; and report all accidents to this office.

No. 1911—October 26. Logansport Furniture Co., Logansport: Place guards on rip saws and over jointer bits; and report all accidents to this office.

No. 1917—October 27. Wm. Heppe & Sons, Logansport: Provide some means of escape for any employed on third floor in case of fire in vicinity of stairway; secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file and employ none under sixteen who can not read and write simple sentences in English language.

No. 1918—October 27. Stevens Bros., Logansport: Provide shield on planer side of resaw to three inches above saw; place guards on rip saws and over jointer bits; post laws.

No. 1919—October 27. Campbell's Steam Laundry, Logansport: Post State law according to section 23.

No. 1920—October 27. Star Steam Laundry, Logansport: Inclose floor pulleys of extractor, and post law.

No. 1922—October 29. C. L. Lawson, Logansport: Provide separate water-closets for male and female employes in Broadway Steam Laundry.

No. 1923—October 29. Parker & Johnson, Logansport: Place guards on rip saws and over jointer bits, and post State law according to section 23.

No. 1924—October 29. John A. Sturkin, Logansport: Place guards on all rip saws, and post law.

No. 1926—October 29. Dorner Truck & Manufacturing Co., Logansport: Post State law according to section 23.

No. 1927—October 29. P., C., C. & St. L. R. R. Co., Logansport: Place guards on rip saws and jointers, and post State laws according to section 23.

No. 1929—October 29. Edward Clawson, Logansport: Post State law according to section 23.

EXHIBIT C.—Orders Issued—Continued.

No. 1932—October 30. Wilson, Humphrey & Co., Logansport: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file, and employ no young persons under sixteen during school sessions who can not read and write the English language; post laws.

No. 1933—October 30. Peru Steel Casting Co., Peru: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; employ no young persons under sixteen during school term who can not read and write the English language; place guards on rip saws and jointer bits; inclose all exposed gearing, moving inward and cover or countersink all protruding setscrews on line and countershafting.

No. 1935—October 30. Peru Basket Co., Peru: Place guards on rip saws.

No. 1936—October 31. Miller Eisaman & Co., Peru: Post State law according to section 23.

No. 1938—October 31. Peru Electric Manufacturing Co., Peru: Repair or replace cables in small elevator; in taking affidavits from parents for minors under sixteen during term of school you will require proof of ability to read and write simple sentences in English before employing.

No. 1940—October 31. The Indiana Manufacturing Co., Peru: Cover or countersink all protruding setscrews on line and counter shafting; repair or replace elevator cable (farthest east).

No. 1941—October 31. The Modern Laundering Co., Peru: Post State law according to section 23.

No. 1944—October 31. Rankin, Wilkinson & Studebaker, Peru: Place guard over swinging cutoff saw, and post law.

No. 1950—October 31. Lewis Meier & Co., Indianapolis: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

No. 1951—October 31. Bemis Indianapolis Bag Co., Indianapolis: Extend guard rail to flywheel and belt in engine-room, about four feet, fully inclosing drive belt; post laws.

No. 1952—October 31. A. M. Fitch & Co., Indianapolis: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file; post hours of labor; keep register in office; post names of young people in room where they work, and post laws.

No. 1955—October 31. Puritan Bed Spring Co., Indianapolis: Cover or countersink all protruding setscrews on shafting and counter shafts; make steps from front to rear of building safe; place guard on separator; place automatic gates on elevator at all floors; report accident to employe who fell down elevator shaft.

No. 1957—January. Indiana Paper and Bag Co., Indianapolis: Section 10, chapter 142, provides that where women and girls are employed separate closets shall be provided for their use. Complaint has been made to this department that you have not done this. Prosecution may follow if the law is not complied with.

EXHIBIT C.—Orders Issued—Continued.

Knight & Jillson: Repair and make safe the automatic gates to elevator in Indiana Paper and Bag Co.'s building.

No. 1958—May. Michael A. Downing, Indianapolis: Place fire escape on Elks' hall, embracing south windows near east front or on southwest windows leading to roof of one story below.

No. 1959—June. C. E. Shover, Indianapolis: Place fire escape on your building No. 328 E. Market street, embracing fourth and fifth windows from east end, south side, third floor; place screen in front of girls' closet; reduce elevator platform so that it may not be overloaded in case of panic, and arrange so as to try the safety valve daily.

No. 1960—June. Indianapolis Top Buggy Co., Indianapolis: Secure affidavits from all minors between the ages of fourteen and sixteen years and keep them on file.

No. 1962—August 16. Terre Haute Manufacturing Co., Terre Haute: Place railing along side of flywheel in engine-room; place guard strips along dynamo belt in main room; place guard on rip saw and safety gates at openings of elevator.

No. 1963. Jerome Allen, Greencastle: Place fire escape on I. O. O. F. hall on east side of building at south window on third floor to window on second floor, with drop ladder to ground; place a balcony on west side at north window, third floor, so as to reach roof of building on the north.

EXHIBIT D.

DECISION OF JUDGE RYAN

(Of Anderson, Madison County)

ON THE

ENFORCEMENT OF THE WEEKLY WAGE LAW BY MANDAMUS PROCEEDINGS.

EXHIBIT D.

Decision of Judge Ryan, of Anderson, Madison County, on the Enforcement of the Weekly Wage Law by Mandamus Proceedings.

The State ex rel. Daniel McAbee, etc., v. The American Plate Glass Co.	No. 3079.

This is an action commenced by the State of Indiana on the relation of Daniel McAbee, Chief Inspector of the Department of Inspection, relating in part to manufacturing establishments of the State and concerning labor, and providing means for protecting the liberty, safety and health of laborers, against the defendant, The American Plate Glass Company, to compel the enforcement by mandate of defendant of a compliance with an act of the Legislature passed in 1899, providing for and requiring the defendant, a corporation organized and doing business under the laws of the State of Indiana, to pay its employes once each week.

Act 2, 1899, p. 193.

The relator's complaint is sworn to, and upon this sworn complaint this court ordered an alternative writ of mandate to issue against the defendant, requiring it to show cause, if any, why it should not comply with the requirements of this law. Upon the service of this writ the defendant filed a motion to quash the writ.

The motion states and assigns six reasons why the alternative writ issued should be vacated and set aside.

The first four reasons assigned attack the validity of the act of the Legislature under and pursuant to which the suit is being prosecuted. The fifth is, that the complaint does not state facts sufficient to constitute a cause of action against the defendant. The sixth avers that the petition does not state facts sufficient to authorize the court to issue a writ of mandate against the defendant.

Taking up the first four reasons assigned for quashing the writ, and going to the validity of the act of the Legislature, which, if void and unconstitutional as claimed by defendant, at once disposes of the whole.

EXHIBIT D.—Decision—Continued.

The right of action, if any, exists by reason of this enactment, and must depend upon the provisions of the act itself. Not being a common law right, we must look to the provisions of the act to determine whether any right of action is created and a remedy for its enforcement. If the attempted legislation, in creating a new right and a remedy for its enforcement, is in contravention of the provisions of the Constitution of the State or of the United States, then it must fall and no cause of action exists in favor of the relator.

Before going to the direct question of the constitutionality of this act, I want to refer to some well-settled questions that must always be considered before the overthrow of a legislative act can be allowed or permitted.

Quoting the latest expression of our own Supreme Court, as found in the case of The State vs. Gerhardt, 145 Ind. 451, we have the well settled principle decided:

"That all presumptions as to the validity of an act of the Legislature must be indulged in its favor, and it is only when made to appear clearly, palpably and plainly, and in such a manner as to leave no reasonable doubt or hesitation in the minds of the court, that a statute violates some provisions of the Constitution that the court can consistently declare it void."

This rule has been repeatedly affirmed by our own Supreme Court, and by other courts generally throughout the nation.

Robinson, Treas., etc. vs. Schenck, 102 Ind. 307;
State ex rel. vs. Roby, 142 Ind. 166.

Another well established principle in Indiana is, that "a statute may be unconstitutional in part and valid as to the residue, and if the unconstitutional portion can be stricken out, and still leave an operative statute, the unconstitutional portions must be regarded as eliminated and the remainder be enforced."

Taggart, Auditor, vs. Claypool, 145 Ind. 590;
145 Ind. 590;
145 Ind. 439;
147 Ind. 476;
138 Ind. 30.

This proposition is nearly as old as the Constitution itself. In the early case of Clark v. Ellis, 2 Blacf'd, p. 8, the court holds that "a part of an act of the General Assembly being unconstitutional, does not affect a constitutional part of the same act relative to the same subject. The part which is unconstitutional is considered as stricken out of the act, and if enough remains to be intelligibly acted upon, it is considered the law of the land." This has been the ruling of our court on this question ever since, the court going so far as to strike out a clause in a single section of the act and holding the remainder of the section good.

The City of Indianapolis vs. Beebe, 138 Ind. 30.

EXHIBIT D.—Decision—Continued.

Counsel for the defendant assails the entire act under consideration as invalid and unconstitutional, and assumes that so much of it is bad that it renders the whole act bad.

The first section is complained of for the reason that it does not operate uniformly and does not apply to all classes alike, and that part contained in the provisions attached to this section renders the section bad, for the reason that it excepts certain employes from its operation, and that the second provision attempts to delegate authority to the Labor Commission to except employes from the operation of the law under certain conditions and circumstances.

The second section of the act goes only to the remedy for the enforcement of the act and is not complained of especially.

The third section of the act is complained of because it attempts to take from the employer the right to make and enforce such rules as will secure to it the best results from the labor of employes.

The validity of the fourth section is questioned because it deprives the parties employed as well as the employers from entering into contracts. Under the decisions of our own court I am not sure but this section is invalid.

In passing upon the validity of a very similar statute to this, our own court has held it constitutional, citing many instances in which the Supreme Court of Indiana has held that the Legislature had the power to enact laws that restrained persons from entering into certain kinds of agreements.

121 Ind. 366.

The fifth and sixth sections of the act apply to the remedy for the enforcement of it if it provides for an enforcible right.

The only objection raised to these two sections is, that under them no right of action exists in favor of the relator, and that the only remedy for a violation of the provisions of the act are found in sections two and five, which provides a penalty for the violation of the provisions of the act, and the right to sue each week for wages due.

When an act of the Legislature provides cumulative and separate remedies for the enforcement of its provisions, it seems to be too well settled to be questioned or to make it necessary to cite authorities in support of the proposition that in enforcing its provisions any one of the remedies may be resorted to.

Now if so much of this statute as construed to be valid is so, and is not in violation of any constitutional right, I think the complaint has sufficient averments to make it good at least against defendant's motion.

If sections three (3) and four (4) are not valid, that of necessity takes out section five (5), as the latter section provides the remedy for enforcing the provisions of the two former sections.

In passing upon the validity of this law I have conceded to defendant's counsel all that they claim, and have eliminated every section and clause of the act that they found objection to, and left only that part not objected to, and as I believe unobjectionable, and having done this, enough

of the enactment is left to make a valid and enforceable law, upon the theory pursued in the case, and with this view of the case defendant's motion to quash the writ is overruled.

Counsel assumes that section two of the act affords the remedy for the enforcement of the rights of employes, and having the remedy provided in this section, to sue for each week and recover the wages due for that week, the remedy by mandate will not lie. It is well settled that where the remedy at law is not as efficient, ample and adequate to enforce a party's right, that mandate will lie; that is, where mandate would be a remedy in the case, and from the resistance the defendant is making, and the vigor and energy with which it attacks the whole law in this case, it may be assumed that defendant does not intend to comply with the requirements of the law unless compelled to do so, and that employes would be compelled under the second section to bring suit every Monday morning, or at the end of each week, as their only remedy; and to admit that such remedy would be as efficient and effective a method of enforcing this law would require a great stretch of the rule of construction indicated. And if the sixth section of the law is broad enough to authorize the remedy of mandate, it certainly should be resorted to, or at least would be a proper remedy.

Then, recurring to the original proposition, which must determine the issue tendered here. After striking out all that part of the act which is claimed to be unconstitutional, is there enough left to be intelligibly acted upon? If so, then so much of the act must be preserved, otherwise the entire act must fall.

Testing the act under consideration by this rule of law, eliminate all of the objectionable parts, and see what is left? Strike out all of section one (1) from the first provision, all of sections two (2), three (3), four (4) and five (5) we have the following enactment left:

"Section 1. Be it enacted by the General Assembly of the State of Indiana, That every person, company, corporation or association employing any person to labor, or in any service for hire, shall make weekly payment for the full amount due for such labor or service in lawful money of the United States, to within six days or less of the time of such payment; but if at any time of stated payment, any employe as aforesaid shall be absent from his regular place of labor or service, he shall be paid in like manner thereafter on demand.

"Sec. 6. It is hereby made the duty of the Chief Inspector to enforce the provisions of this act by the processes of the courts, and in the name of the State, and upon failure so to do, any citizen of the State is hereby authorized to do the same in the name of the State."

This leaves a legislative enactment of two sections, the first one providing for and requiring payment of wages weekly, and the other providing a means or method of enforcing such payment.

Or accept section two as valid and strike out as objectionable all of the act as above indicated, except section two (2), and this leaves section one (1), with the provisos omitted, the sections two (2) and six (6) complete, the latter two sections simply providing the different remedies for

the enforcement of the provisions of the first section, with the objectionable parts eliminated, and it still leaves an enforceable act of three sections, being section one (1), omitting the provisos, and sections two (2) and six (6).

The right of requiring such payment by the Legislature has not been seriously questioned by counsel attacking this law, and I can find no serious objection to it.

The authority delegated to the Chief Inspector and the Department of Inspection to enforce this provision by the processes of the court is reasonable and similar to many other such statutory provisions, and one of the processes of the court and one recognized by our statute for compelling the performance of a statutory requirement is the remedy by mandate as resorted to in this case.

DECISION OF JUDGE LEFFLER ON WEEKLY WAGE LAW.

State of Indiana, County of Delaware—ss.
State of Indiana, etc., vs. Republic Iron and Steel Company.

This is an action by the State of Indiana on the relation of D. H. McAbee against the Republic Iron and Steel Company to recover wages due and unpaid and penalty therefor under the act of the Legislature of 1899, providing for weekly payment of wages due employes, and penalty for not paying such wages once every week.

The questions here raised are raised on demurrer to the complaint.

Counsel for defendant contend that the law is unconstitutional, (1) because the act makes the State plaintiff in the action and provides that if a certain officer of the State does not bring the suit, that any citizen of the State may prosecute this action or a similar one; (2) that the act violates the Constitution of the United States and the Constitution of the State of Indiana, for the reason that it deprives persons of both liberty and property without due process of law, and deprives them of the liberty of contract; (3) that the act is unconstitutional for the reason that it falls within the species of legislation called "class legislation;" (4) because the provision therein, lodging the power in the Labor Commissioners of the State in certain cases, and under certain conditions, to exempt parties from the payment of wages weekly.

Our Supreme Court has said, in the case of Hancock vs. Yaden, 121 Ind., page 369, that "It is a fundamental principle that every member of society surrenders something of his absolute and natural rights in all organized States. Without some yielding of absolute rights civil government would be impossible. The right to contract is not, and never has been in any country, where, as in ours, the common law prevails and constitutes the source of all civil law, entirely beyond legislative control. That this legislative authority is limited no one doubts, but it is limited only by the Constitution."

But counsel for defendant insists that our Supreme Court, in the case above referred to, did not decide that that part of the act which provided for the payment of wages every two weeks, was valid. Concede that

counsel is right in this contention, and the opinion is still in conflict with the opinion in the Illinois case above referred to. But it seems to me, on principle, that if the Legislature has a right to regulate the mode of payment of the wages of labor, then undoubtedly it has the right to regulate the time of such payment.

In Churchman vs. Martin, 54 Ind. 380, our Supreme Court held that a statute prohibiting parties from contracting to pay attorneys' fees was constitutional. Usury laws have been enacted and upheld by all civilized nations of the world, thereby saying to persons, "You can not make and enforce contracts to pay more than a stipulated rate of interest." But counsel for defendant say that usury laws proceed upon the theory that the lender and the borrower of money do not occupy the same relations of equality. Can it be successfully contended that the individual laborer, dependent upon his labor alone for maintenance and support, is upon an equality with a corporation composed of the aggregate capital of individuals?

It seems to me that a usury law, limiting the right to contract, is constitutional because the borrower and lender are not upon an equality, then this law, as applied to corporations, is valid.

The Supreme Court of the United States has considered the constitutionality of the act of Congress of June 27, 1890, making it a misdemeanor for an attorney to contract for, or receive, more than $10 for prosecuting a claim for a pension, and has decided the act to be constitutional.

And the Supreme Court of the State of Massachusetts, on May 6, 1895, decided that the act in that State providing for the weekly payment of wages was constitutional. (40 N. E. 713.)

It is insisted by counsel for the defendant that the act is unconstitutional because it embraces not only corporations, but individuals and partnerships as well. If it were unconstitutional as to all others except corporations, the defendant in this case could not be permitted to litigate the constitutionality of the act as to others.

Our Supreme Court has said, in Pittsburg, etc., R. Co. vs. Montgomery, 152 Ind., page 13: "It will be time enough to decide its validity as to others when any of them come before this court with a case presenting this question," and cite in support of this doctrine Henderson vs. The State ex rel., 137 Ind. 552; Board, etc., Reeves, 148 Ind. 467; Currier vs. Elliott, 141 Ind. 394.

As to the question raised by counsel for defendant, that the act is unconstitutional for the reason that it provides, "If a certain officer of the State does not bring suit, then any citizen of the State may prosecute the action," our Supreme Court has said, in 121 Ind. 521, that "It is well settled that when a part of a statute is unconstitutional, if by striking from the act all that part which is void, that which is left is complete in itself, sensible, capable of being executed and wholly independent of that which is rejected, the courts will reject that which is unconstitutional and enforce the remainder."

EXHIBIT D.—Decision—Continued.

The action, if maintained, will be maintained independently of the provision in the act that any citizen may maintain a suit on failure of the certain officer of the State so to do.

Counsel for defendant contend that the act is invalid because of the provision therein lodging the power in the Labor Commissioners of the State, in certain cases, and under certain conditions, to exempt parties from the payment of wages weekly. This position I think untenable, for it seems to me that these Commissioners, under this statute, act merely in an administrative capacity. (47 N. E. Rep. 1043.)

But, if this portion of the act were unconstitutional, then that portion might be stricken from the act, and that which is left would be complete within itself, sensible, capable of being executed and wholly independent of that which is rejected.

The contention by defendant that the act is unconstitutional for reasons that it exempts from its provisions employes engaged as common carriers in interstate commerce, presents, I think, a more difficult question. Yet our Supreme Court has upheld statutes that, to my mind, are as open to the attack that they are class legislation as the act at bar. For instance, the act of 1889, providing for the payment of wages to labor every two weeks in lawful money of the United States, and making it unlawful to contract for such payment in anything else except the lawful money of the United States by any corporation, association, company, firm or person engaged in mining coal, ore or other minerals, or quarrying stone, or in manufacturing iron, steel, lumber, staves, heading barrels, brick, tile, machinery, agricultural or mechanical implements, or any article of merchandise.

Judge Elliott, in the opinion of the court in the case heretofore referred to, being the case of Hancock vs. Yaden, in the opinion of the court, upon the constitutionality of the act just read, says:

"If there be no valid statute prohibiting such a contract, it would be competent for the parties to make it so that the ultimate judgment of the court hinges upon the question whether there is a valid statute prohibiting such contract" (referring to the contract made by an employe to receive his wages in other than the lawful money of the United States). Further the judge says: "There is a statute which, in terms, prohibits such contracts. And if it does not violate some provision of the Constitution, it totally destroys the contract upon which the defense is founded (referring to the statute above mentioned, being sections 1599 and 1610 Elliott's supplement). Our judgment is that the provision of the statute forbidding the execution of a contract waiving a right to payment in money is one that the Legislature had power to enact."

And again our Supreme Court has said, in the case of Townsend vs. The State, 147 Ind. 635, "Whether a statute encroaches upon the natural rights of a citizen is a legislative and not a judicial question; and courts can not overthrow it on that ground." The court further says, in that opinion, "The contention of appellant that the act is void because, as he asserts, it violates the spirit of our institutions, or impairs those rights which it is the object of free government to protect, can not be

maintained, nor can it be declared unconstitutional simply because it may be wrong and unjust; for with the justice, the propriety or the policy of a statute the courts have nothing whatever to do, so long as the act does not infringe some provision of the Constitution, State or Federal, or some voted treaty or law of Congress."

Then, clearing away all that has been said about this act by counsel for the defendant in reference to the injustice, the propriety or the policy thereof, which our Supreme Court says are matters for the Legislature and not for the courts, and consider the only question that the court can consider, namely, Does this act infringe some provision of the Constitution?

Does it deprive persons of liberty and property without due process of law, and of the liberty to contract so as to be an infringement of the Constitution?

In support of the contention that this act is unconstitutional, for the reasons above named, counsel for the defendant cite the decision of the Supreme Court of the State of Illinois, being the case of Braceville Coal Company vs. The People, reported in the 37 Fed. Rep., page 206, and decisions of the Supreme Court of Ohio, Arkansas, Missouri, New York, Pennsylvania and other authorities, and claim that the act declared unconstitutional by the Supreme Court of Illinois, in the case above referred to, is like the act in controversy here, with the exception that the Illinois act did not exempt common carriers. But, in that case, one reason for the court holding as it did, to use its exact language, was: "The act under consideration applies not to all corporations existing within the State, or all that have been, or may be, organized for pecuniary profit under the general incorporation laws of Illinois."

The Supreme Court of Illinois, in closing the opinion in that case, said: "The right to contract necessarily includes the right to fix the price at which labor will be performed and the mode and time of payment."

This holding of the Illinois court, that the right to contract necessarily includes the right to fix the price at which labor will be performed and the mode and time of payment, is in direct conflict with the Supreme Court of the State of Indiana in the case of Hancock vs. Yaden, reported in the 121 Ind., above referred to. In that case, the Indiana court held that a statute was constitutional that forbid the execution of contracts waiving the right of payment of wages for labor in money, and which provided for the payment of wages for labor every two weeks by persons and corporations engaged in certain lines of business; thereby holding that the Legislature had the right, in such cases, to control the mode and time of payment of wages for labor.

Another is the case of the Pittsburg, etc., R. Co. vs. Montgomery, 152 Ind., page 3. In that case our Supreme Court upheld a statute, similar, in one respect, to the act at bar. The act passed upon in that opinion, among other things, provided that every railroad or other corporations, except municipal, operating in this State, shall be liable for damages for personal injuries suffered by an employe while in its service,

the employe so injured being in the exercise of due care and diligence. Thus it will be seen that this act included all corporations except municipal corporations.

Questionable as it may seem as to what these cases hold in this respect, it is the duty of the court to resolve whatever doubt there may be in favor of the constitutionality of the act, for this is the rule that governs the Supreme Court itself in passing upon the constitutionality of an act. (102 Ind. 307; 112 Ind. 206; 109 Ind. 278; 101 Ind. 16.)

The demurrer to the complaint is overruled.

EXHIBIT E.

Inspection Laws and Others Enforced By This Department.

EXHIBIT E.—INSPECTION LAWS AND OTHERS ENFORCED BY THIS DEPARTMENT.

CHAPTER CXLII.

AN ACT concerning labor, and providing means for protecting the liberty, safety and health of laborers, providing for its enforcement by creating a department of inspection, and making an appropriation therefor, repealing all laws in conflict therewith.

[H. 214. Approved March 2, 1899.]

Section 1. Be it enacted by the General Assembly of the State of Indiana, That no person under sixteen years of age, and no female under eighteen years of age, employed in any manufacturing or mercantile establishment, laundry, renovating works, bakery or printing office, shall be required, permitted or suffered to work therein more than sixty hours in any one week, nor more than ten hours in any one day, unless for the purpose of making a shorter day on the last day of the week; nor more hours in any one week than will make an average of ten hours per day for the whole number of days which such person or such female shall so work during such week; and every person, firm, corporation or company employing any person under sixteen years of age, or any female under eighteen years of age in any establishment as aforesaid, shall post and keep posted in a conspicuous place in every room where such help is employed a printed notice stating the number of hours of labor per day required of such person for each day of the week, and the number of hours of labor exacted or permitted to be performed by such persons shall not exceed the number of hours of labor so posted as being required. The time of beginning and ending the day's labor shall be the time stated in such notice: Provided, That such female under eighteen and persons under sixteen years of age may begin after the time set for beginning and stop before the time set in such notice for the stopping of the day's labor, but they shall not be permitted or required to perform any labor before the time stated on the notices as the time for beginning the day's labor, nor after the time stated upon the notices as the hour of ending the day's labor.

Sec. 2. No child under fourteen years of age shall be employed in any manufacturing or mercantile establishment, mine, quarry, laundry, renovating works, bakery or printing office within this State. It shall be the duty of every person employing young persons under the age of sixteen years to keep a register, in which shall be recorded the name,

birthplace, age and place of residence of every person employed by him under the age of sixteen years; and it shall be unlawful for any proprietor, agent, foreman or other person connected with a manufacturing or mercantile establishment, mine, quarry, laundry, renovating works, bakery or printing office to hire or employ any young person to work therein without there is first provided and placed on file in the office an affidavit made by the parent or guardian, stating the age, date and place of birth of said young person; if such young person have no parent or guardian, then such affidavit shall be made by the young person, which affidavit shall be kept on file by the employer, and said register and affidavit shall be produced for inspection on demand made by the Inspector, appointed under this act. There shall be posted conspicuously in every room where young persons are employed, a list of their names, with their ages, respectively. No young person under the age of sixteen years, who is not blind, shall be employed in any establishment aforesaid, who can not read and write simple sentences in the English language, except during the vacation of the public schools in the city or town where such minor lives. The Chief Inspector of the Department of Inspection shall have the power to demand a certificate of physical fitness from some regular physician in the case of young persons who may seem physically unable to perform the labor at which they may be employed, and shall have the power to prohibit the employment of any minor that can not obtain such a certificate.

Sec. 3. No person or corporation, or officer or agent thereof, shall employ any woman or female young person in any capacity for the purpose of manufacturing, between the hours of ten o'clock at night and six o'clock in the morning.

Sec. 4. No person, company, corporation or association shall employ or permit any young person to have the care, custody, management of or to operate any elevator.

Sec. 5. It shall be the duty of the owner or lessee of any manufacturing or mercantile establishment, laundry, renovating works, bakery or printing office, where there is an elevator, hoisting shaft or well hole, to cause the same to be properly and substantially inclosed or secured, if in the opinion of the Chief Inspector it is necessary, to protect the lives or limbs of those employed in such establishment. It shall also be the duty of the owner, agent or lessee of each of such establishments to provide, or cause to be provided, if in the opinion of the Chief Inspector the safety of persons in or about the premises should require it, such proper trap or automatic doors so fastened in or at all elevator ways as to form a substantial surface when closed, and so constructed as to open and close by the action of the elevator in its passage, either ascending or descending, but the requirements of this section shall not apply to passenger elevators that are closed on all sides. The Chief Inspector shall inspect the cables, gearing or other apparatus of elevators in the establishments above enumerated and require that the same be kept in safe condition with proper safety devices whereby the cabs or cars will be securely held in event of accident to the cable or rope or hoisting machinery, or from any similar cause.

EXHIBIT E.—Inspection Laws—Continued.

Sec. 6. Proper and substantial handrails shall be provided on all stairways in all establishments above enumerated, and where, in the opinion of the Chief Inspector it is necessary, the steps of said stairs in all such establishments shall be substantially covered with rubber, securely fastened thereon, for the better safety of persons employed in said establishments. The stairs shall be properly screened at the sides and bottom. All doors leading in or to such establishments aforesaid shall be so constructed as to open outwardly where practicable, and shall be neither locked, bolted nor fastened during working hours.

Sec. 7. In every manufacturing or other establishment, where the machinery used is propelled by steam, communication shall be provided between each room where such machinery is placed and the room where the engineer is stationed, by means of speaking tubes, electric bells or appliances that may control the motive power, or such other means as shall be satisfactory to the Chief Inspector: Provided, That in the opinion of the Inspector such communication is necessary.

Sec. 8. It shall be the duty of the owner, agent, superintendent or other person having charge of any manufacturing or mercantile establishment, mine, quarry, laundry, renovating works, bakery or printing office within this State, or of any floor or part thereof to report in writing to the Chief Inspector all accidents or injury done to any person in such premises within forty-eight hours of the time of the accident, stating as fully as possible the extent and cause of such injury, and the place where the injured person is sent, with such other information relative thereto as may be required by the Chief Inspector. The Chief Inspector is hereby authorized and empowered to fully investigate the causes of such accident and to require such reasonable precautions to be taken as will, in his judgment, prevent the recurrence of similar accidents.

Sec. 9. It shall be the duty of the owner of any aforesaid establishment, or his agent, superintendent or other person in charge of the same, to furnish and supply, or cause to be furnished and supplied therein, in the discretion of the Chief Inspector, where machinery is used, belt shifters or other safe mechanical contrivances for the purpose of throwing on or off belts or pulleys; and whenever possible, machinery therein shall be provided with loose pulleys; all vats, pans, saws, planers, cogs, gearing, belting, shafting, set screws and machinery of every description therein shall be properly guarded, and no person shall remove or make ineffective any safeguard around or attached to any planer, saw, belting, shafting or other machinery, or around any vat or pan, while the same is in use, unless for the purpose of immediately making repairs thereto, and all such safeguards shall be promptly replaced. By attaching thereto a notice to that effect, the use of any machinery may be prohibited by the Chief Inspector should such machinery be regarded as dangerous. Such notice must be signed by the Chief Inspector, and shall only be removed after the required safeguards are provided, and the unsafe or dangerous machinery shall not be used in the meantime. Exhaust fans of sufficient power shall be provided for the purpose of carrying off dust from emery wheels and grindstones and dust-creating machinery from establish-

ments where used. No person under sixteen years of age, and no female under eighteen years of age, shall be allowed to clean machinery while in motion.

Sec. 10. A suitable and proper wash-room and water-closets shall be provided by the owner, agent or lessee in each establishment above enumerated, and such water-closets shall be properly screened and ventilated and be kept at all times in a clean condition, with not less than one seat for each twenty-five persons, and one seat for each fraction thereof above ten, employed in such establishment; and if women and girls are employed in any such establishment, the water-closets used by them shall have separate approaches and be separate and apart from those used by the men. All water-closets shall be kept free of obscene writing and marking. A dressing-room shall be provided for women and girls, when required by the Chief Inspector, in any establishment aforesaid in which women and girls are employed; and the employer of such women and girls shall provide a suitable seat for the use of each female employe placed conveniently where she works, and shall permit the use of the same when she is not necessarily engaged in the active duties for which she is employed, and such seats shall be constructed or adjusted where practicable so as to be a fixture and not obstruct such female when actually engaged in the performance of such duties when such seat can not be used.

Sec. 11. Not less than sixty minutes shall be allowed for the noonday meal in any aforesaid establishment in this State. The Chief Inspector shall have the power to issue written permits in special cases, allowing shorter meal time at noon, and such permit must be conspicuously posted in the main entrance of the establishment, and such permit may be revoked at any time the Chief Inspector deems necessary, and shall only be given where good cause can be shown.

Sec. 12. The walls and ceilings of each room in every establishment aforesaid, shall be lime-washed or painted, when in the opinion of the Chief Inspector it shall be conducive to the health or cleanliness of the persons working therein.

Sec. 13. The Chief Inspector, or other competent person designated for such purpose by the Chief Inspector, shall inspect any building used as aforesaid, or anything attached thereto, located therein, or connected therewith which has been represented to be unsafe or dangerous to life or limb. If it appears upon such inspection that the building or anything attached thereto, located therein, or connected therewith, is unsafe or dangerous to life or limb, the Chief Inspector shall order the same to be removed or rendered safe and secure, and if such notification be not complied with within a reasonable time, he shall prosecute whoever may be responsible for such delinquency.

Sec. 14. No room or rooms, apartment or apartments in any tenement or dwelling house shall be used for the manufacture of coats, vests, trousers, knee-pants, overalls, cloaks, furs, fur trimmings, fur garments, shirts, purses, feathers, artificial flowers or cigars, for sale, excepting by the immediate members of the family living therein. No person,

firm or corporation shall hire or employ any persons to work in any one room or rooms, apartment or apartments, in any tenement or dwelling house, or building in the rear of a tenement or dwelling house at making, in whole, or in part, any vests, coats, trousers, knee-pants, fur, fur trimmings, shirts, purses, feathers, artificial flowers or cigars, for sale, without obtaining first a written permit from the Chief Inspector, which permit may be revoked at any time the health of the community, or of those employed therein, may require it, and which permit shall not be granted until an inspection of such premises is made by the Chief Inspector or a Deputy Inspector, and the maximum number of persons allowed to be employed therein shall be stated in such permit. Such permit shall be framed and posted in a conspicuous place in the room, or in any one of the rooms to which it relates.

Sec. 15. No less than two hundred and fifty cubic feet of air space shall be allowed for each person in any workroom where persons are employed during the hours between six o'clock in the morning and six o'clock in the evening, and not less than four hundred cubic feet of air space shall be provided for each person in any workroom where persons are employed between six o'clock in the evening and six o'clock in the morning. By a written permit the Chief Inspector may allow persons to be employed in a room where there are less than four hundred cubic feet, but not less than two hundred and fifty cubic feet of air space for each person employed between six o'clock in the evening and six o'clock in the morning: Provided, Such room is lighted by electricity at all times during such hours while persons are employed therein. There shall be sufficient means of ventilation provided in each workroom of every manufacturing or mercantile establishment, laundry, renovating works, bakery or printing office within this State, and the Chief Inspector shall notify the owner in writing to provide, or cause to be provided, ample and proper means of ventilation for such workroom, and shall prosecute such owner, agent or lessee if such notification be not complied with within twenty days of the service of such notice.

Sec. 16. Proprietors, agents or managers of any manufacturing, or mercantile establishment, mine or quarry, laundry, renovating works, bakery or printing office, are prohibited from discriminating against any person or persons, or class of labor seeking work, by posting notices or otherwise.

Sec. 17. It shall be unlawful for notaries public and other officers to receive more than ten cents for the preparing and certifying to a "Certificate of Parent or Guardian," provided for in this act.

Sec. 18. The language used in this act shall be interpreted to have the following meaning: The word "person" means any individual, corporation, partnership, company or association. The word "child" means a person under the age of fourteen years. The words "young person" means a person of the age of fourteen years and under the age of eighteen years. The word "woman" means a female of the age of eighteen years and upwards. The words "manufacturing or mercantile establishment, mine, quarry, laundry, renovating works, bakery or printing office"

means any mill, factory, workshop, store, place of trade or other estab-
for sale, or any mine or quarry where coal and stone are mined and
lishment where goods, wares or merchandise are manufactured or offered
quarried for the market, and persons are employed for hire.

Sec. 19. For the purpose of carrying out the provisions of this act, a Department of Inspection is hereby created, and the Governor shall, by and with the advice and consent of the Senate, appoint a Chief Inspector to have charge of said department. Said Inspector shall hold and continue in office after the expiration of his term of office until his successor shall have been appointed and qualified. The term of office of the Chief Inspector shall be for four years. The annual salary of such Chief Inspector shall be one thousand eight hundred dollars ($1,800) and actual expenses when absent from home in the discharge of his official duties. Said Chief Inspector shall, by and with the consent of the Governor, appoint two deputy Inspectors, whose salary shall be one thousand dollars ($1,000) each per annum, and actual expenses when absent from home in the discharge of their official duties. But said actual expenses for the Department of Inspection shall in no year exceed the sum of one thousand five hundred dollars ($1,500), and the duties of the Deputy Inspectors shall be such as shall be assigned them by the Chief Inspector. Said Chief Inspector shall also employ a stenographer at a salary not to exceed six hundred dollars ($600) per annum. The salary and actual expenses of said Deputy Inspectors and stenographer shall be paid monthly as due, on vouchers duly attested before some officer authorized to administer oaths, and approved and signed by the Chief Inspector. and the salary and actual expenses of the Chief Inspector shall be paid in monthly installments, out of the treasury of the State, upon warrant of the Auditor of State, and the total annual appropriation of five thousand nine hundred dollars ($5,900) for such payments aforesaid, is hereby made out of any moneys in the State treasury not otherwise appropriated. Provided, That the Auditor of State shall issue no warrant except upon itemized bills, sworn to, and presented by the Chief Inspector provided for in this act.

Sec. 20. The Custodian of the State Capitol shall assign a suitable and sufficient room or rooms therein for use as the office of said Department of Inspection, and provide the same with all necessary furniture and janitor service.

Sec. 21. The Chief Inspector shall keep a record of all inspections and examinations made by his department, and copies of all notices and orders made by him, and, at the close of his term of office, transfer the books containing the same to his successor. He shall make an annual report of his doings as such Inspector to the Governor at the close of each fiscal year, and cause the same to be printed, at the expense of the State, not later than the first day of January next ensuing in such numbers as the Governor may approve. Such Inspector and Deputy Inspectors shall have power as notaries public to administer oaths and take affidavits in matters connected with the enforcement of the provisions of this act.

EXHIBIT E.—Inspection Laws—Continued.

Sec. 22. It shall be the duty of the Chief Inspector to cause this act to be enforced and to cause all violators of the same to be prosecuted, and for that purpose he is empowered to visit and inspect at all reasonable hours and as often as shall be practicable and necessary all manufacturing or other establishments to which this bill relates. It shall be the duty of the Chief Inspector to examine into all violations of laws made for the benefit or protection of labor and to prosecute all violations thereof. It shall be unlawful for any person to interfere with, obstruct or hinder said Chief Inspector or Deputy Inspectors while in the performance of his or their duties, or to refuse to properly answer questions asked by him or them with reference to any of the provisions hereof.

Sec. 23. It shall be the duty of the Chief Inspector to supply all blanks necessary to make reports to his office, as required in this act, and be furnished [to furnish] copies of this act, which shall be conspicuously posted or hung, and kept posted or hung, in each workroom of every manufacturing or other establishment to which it relates, in the State, by the proprietor or occupant thereof.

Sec. 24. The Prosecuting Attorney of any county of this State is hereby required upon request of the Chief Inspector, or of any other person of full age, to commence and prosecute to a termination before any court of competent jurisdiction, in the name of the State, actions or proceedings against any person or persons reported to him to have violated the provisions of this act.

Sec. 25. Any person who violates or omits to comply with any of the provisions of this act, or who refuses to comply with the orders of the Chief Inspector, properly made under the provisions of this act, or who suffers or permits any young person or child to be employed in violation of its provisions, shall be deemed guilty of a misdemeanor, and on conviction shall be fined not more than fifty dollars for the first offense, and not more than one hundred dollars for the second offense, to which may be added imprisonment for not more than ten days, and for the third offense a fine of not less than two hundred and fifty dollars and not more than thirty days' imprisonment in the county jail.

Sec. 26. Any person, company, corporation or association aggrieved by any order of the Chief Inspector may appeal to the Circuit Court in the county where the person, firm or corporation owns, leases or occupies the factory or buildings in relation to which said order relates, within ten days after notice of such order shall have been given. Said appeal shall operate as a supersedeas, shall be made in writing, and contain a brief statement of the facts and reasons for such appeal and a citation for the Chief Inspector to appear before said court, and said court or any Judge thereof may direct the time of appearance and manner of service. Said court may review the doings of the Chief Inspector, may examine the questions in issue, and may confirm, change or set aside the doings of the Chief Inspector, in this particular case, and may make such orders in the premises, including orders as to costs, as it may find to be proper and equitable.

EXHIBIT E.—Inspection Laws—Continued.

Sec. 27. In case of an appeal from any order of the Chief Inspector the Prosecuting Attorney of the Circuit Court shall appear as counsel for the State to sustain and defend such orders, and in case such order be sustained on such appeal, a fee of twenty-five dollars shall be taxed against the appellant as the Prosecuting Attorney's fees, which fee shall be taxed as costs in the case.

Sec. 28. All laws and parts of laws in conflict with the provisions of this act are hereby repealed.

CHAPTER CXXXIV.

AN ACT providing for the weekly payment of wages due employes. making it unlawful for an employer to assess a fine against the wages of an employe, and regulating changes in rate of wages, prohibiting the assignment of future wages; providing for its enforcement and repealing all laws in conflict therewith.

[S. 134. Approved February 28, 1899.]

Section 1. Be it enacted by the General Assembly of the State of Indiana, That every person, company, corporation or association employing any person to labor, or in any other service for hire, shall make weekly payments for the full amount due for such labor or service. in lawful money of the United States to within six days or less of the time of such payment; but if, at any time of stated payment, any employe as aforesaid shall be absent from his regular place of labor or service he shall be paid in like manner thereafter on demand: Provided, That this act shall not apply to any employe engaged by a common carrier in interstate commerce: and, Provided, That the Labor Commissioners of the State, after notice and hearing, may exempt any of the aforesaid parties whose employes prefer a less frequent payment, from paying any of its employes weekly, if, in the opinion of the said Commissioners, the interests of the public and of such employes will not suffer thereby.

Sec. 2. The Chief Inspector of the Department of Inspection of this State, or any person interested, may bring suit in the name of the State in any court of competent jurisdiction, and the prosecuting attorney of any county wherein such suit is brought, shall prosecute the same against any person, company, corporation or association that neglects or refuses to comply with Section 1 of this act, within ten days after such payment is due and left unpaid; and in case judgment is rendered in favor of said employe and against said defendant for the sum alleged to be due or any part thereof, six per centum of such sum shall be added to such judgment from the time when payment was due; and a penalty of fifty per centum of the amount of such judgment shall be assessed and collected from said defendant by said court and paid into the school fund of the State.

EXHIBIT E.—Inspection Laws—Continued.

Sec. 3. It shall be unlawful for any employer to assess a fine on any pretext against any employe and retain the same or any part thereof from the wages of said employe at the time of payment fixed in this act, or at any other time, and a change in the current rate of wages paid is prohibited without a written notice given to each employe so affected twenty-four hours before such change shall take place.

Sec. 4. The assignment of future wages, to become due to employes from persons, companies, corporations or associations affected by this act, is hereby prohibited, nor shall any agreement be valid that relieves said persons, companies, corporations or associations from the obligation to pay weekly, the full amount due, or to become due, to any employe in accordance with the provisions of this act. Provided, That nothing in this act shall be construed to prevent employers advancing money to their employes.

Sec. 5. Any person, company, corporation or association, found guilty by a court of competent jurisdiction of having violated the third and fourth sections of this act, shall be deemed guilty of having committed a misdemeanor, and shall be fined by such court in any sum not exceeding two hundred dollars.

Sec. 6. It is hereby made the duty of the Chief Inspector and of the Department of Inspection to enforce the provisions of this act by the processes of the courts, and in the name of the State; and, upon their failure so to do, any citizen of the State is hereby authorized to do the same in the name of the State.

Sec. 7. All laws or parts of laws in conflict with the provisions of this act are hereby repealed.

CHAPTER CCVII.

AN ACT to provide for the protection of the public from fire, providing for its enforcement, and with penalties for the violation thereof, and repealing all laws in conflict therewith.

[H. 228. Approved March 6, 1899.]

Section 1. Be it enacted by the General Assembly of the State of Indiana, That every building now or hereafter used, in whole or in part, as a public building, public or private institution, sanitarium, surgical institute, asylum, schoolhouse, dormitory, church, theater, public hall, place of assemblage or place of public resort; and every building in which persons are employed above the second story in a factory, workshop, or mercantile or other establishment; and every hotel, family hotel, apartment house, boarding house, lodging house, club-house, or tenement-house in which persons reside or lodge above the third story; and every factory, workshop, mercantile or other establishment of more than two stories in height, shall be provided with proper

ways of egress or means of escape from fire sufficient for the use of all persons accommodated, assembled, employed, lodged or residing in such building, and such ways of egress and means of escape shall be kept free from obstruction, in good repair and ready for use at all times, and all rooms above the second story in any such building shall be provided with more than one way of egress or escape from fire, placed as near as practicable at opposite ends of the room, and leading to fire-escapes on the outside of such buildings or to stairways on the inside, provided with proper railings. All external doors subject to the provisions of this section shall open outward, and all windows open outward or upward. No portable seats shall be allowed in the aisles or passageways of such buildings during any entertainment or service held therein. The proscenium or curtain-opening of all theaters shall have a fire-resisting curtain of some incombustible material, and such curtain shall be properly constructed and shall be operated by proper mechanism; the certificate of the Chief Inspector of the Department of Inspection of the State shall be conclusive evidence of a compliance with such requirements.

Sec. 2. In addition to the foregoing means of escape from fire, all such buildings as are enumerated in Section 1 of this act, as are more than three stories in height, shall have one or more fire-escapes on the outside of said building, as may be directed by the Chief Inspector aforesaid, except in such cases as the said Chief Inspector may deem such fire-escapes to be unnecessary in consequence of adequate provision having been already made for the safety in the event of fire, and in such cases of exemption, the said Chief Inspector shall give the owner, lessee or occupant of said building a written certificate to that effect and his reasons therefor; and such fire-escapes as are provided for in this section shall be connected with each floor above the first, well fastened and secured, and of sufficient strength, each of which fire-escapes shall have landings or balconies not less than nine feet in length and three feet in width, guarded by iron railings not less than three feet in height, and embracing at least two windows at each story and connecting with the interior by easily accessible and unobstructed openings, and the balconies or landings shall be connected by iron stairs, not less than eighteen inches wide, the steps not to be less than six inches tread nor more than nine inches rise, placed at a slant of not more than forty-five degrees, and protected by a well-secured hand-rail on both sides, with a twelve-inch wide drop-ladder from the lower platform, reaching to the ground; except in cases of school buildings instead of drop-ladder, the ladders reaching from balconies to the ground shall be permanent, and so placed as to stand at an angle of forty-five degrees or less.

Sec. 3. Any other plan or style of fire-escape shall be sufficient, if approved by the Chief Inspector, but if not so approved, the Chief Inspector may notify the owner, proprietor or lessee of such establishment, or if the building in which such establishment is conducted, or the agent or superintendent, or school officer, or either of them, in writing, that any such plan or style of fire-escape is not sufficient, and may, by

an order in writing, served in like manner, require one or more fire-escapes, as he shall deem necessary and sufficient, to be provided for such establishment at such location and such plan and style as shall be specified in such written order. Within twenty days after the service of such order the number of fire-escapes required in such order for such establishment shall be provided therefor, each of which shall be of the plan and style and in accordance with the specifications in said order required. The windows or doors to each fire-escape shall be of sufficient size and be located as far as possible consistent with accessibility from the stairways and elevator hatchways or openings, and the ladder thereof shall extend to the roof. Stationary stairs or ladders shall be provided on the inside of such establishment from the upper story to the roof, as a means of escape in case of fire.

Sec. 4. Every keeper of a hotel, boarding or lodging house or apartment house containing fifty and less than one hundred rooms, and being more than three stories high, shall have therein at least one competent watchman on duty between the hours of nine o'clock in the afternoon and six o'clock in the forenoon; and in all hotels, boarding houses, lodging houses or apartment houses containing one hundred or more rooms and being four or more stories in height, not less than two such watchmen shall be provided and kept on duty as aforesaid, each properly assigned. And in all hotels or lodging or other houses as are mentioned in this section, the halls and stairways shall be properly lighted at night, and at the head and foot of each flight of stairs, and at the intersection of all hallways with the main corridors, shall be kept during the night a red light and one or more proper alarms or gongs, capable of being heard throughout the house, shall always remain easy of access and ready for use in each of said buildings, or an electric alarm bell in each sleeping room, approved by the Chief Inspector, to give notice to the inmates in case of fire. And every keeper of such hotel, boarding or lodging house or other house, shall keep posted in a conspicuous place in every sleeping-room a notice descriptive of all means of escape.

Sec. 5. Every owner, lessee, proprietor or manager of a hotel or lodging house of more than three stories high, situated in this State, which is not otherwise suitably provided with fire-escapes for the protection of human life in case of fire, shall place, or cause to be placed, a chain and knotted rope, or other better appliance, in every room of said hotel or lodging house used as a lodging room in rooms above the third floor, said chain to be at least ten feet in length and securely fastened at one end of it to a bolt extending through the wall of the building over lintel of window, the other or lower end of said chain to be firmly attached to the knotted rope, which rope shall be at all times kept coiled in an uncovered box, placed near the inside of the window and exposed to the plain view of any occupant of said room, in such manner as to be easily and quickly uncoiled; such rope shall contain knots not more than eighteen inches apart, and a loop on the end at least three inches in length, and shall be not less than one-half inch in diameter and of sufficient length to reach from such window to the

ground. Such rope, chain, bolt and fastenings shall be of sufficient strength to sustain a weight of four hundred pounds, and there shall be plain directions how to use such rope or other better appliance printed and posted within six inches of the casing of the window where such appliance or chain rope is fastened.

Sec. 6. The owner of any building designated in this act, or the lessee or occupant thereof, or any school officer or other officer having charge of public property, who neglects or refuses to comply with any of the provisions of this act, shall be fined not exceeding two hundred dollars, and be deemed guilty of a misdemeanor punishable by imprisonment for not less than one month nor more than two months. And in case of fire occurring in said building or buildings in the absence of such fire-escape or escapes the said person or persons or corporations or public officials shall be liable in an action for damages with a penalty of five thousand dollars for the life of each person killed in case of death, or for damages for personal injuries sustained in consequence of such fire breaking out in said building, and shall also be deemed guilty of a misdemeanor punishable by imprisonment for not less than six months, nor more than twelve months in the county jail; and such action for damages may be maintained by any person now authorized by law to sue as in other cases of similar injuries: Provided. That nothing in this act shall interfere with fire-escapes now in use approved by the Chief Inspector.

Sec. 7. The Chief Inspector of the Department of Inspection of the State is hereby charged with the enforcement of this act, and shall see that its provisions are observed and enforced, and for this purpose he or his deputies shall have free access at all reasonable hours to all buildings embraced herein; and the Prosecuting Attorney in each county of the State shall render all necessary legal assistance as may be required by said Chief Inspector in enforcing this act.

Sec. 8. All laws and parts of laws in conflict with the provisions of this act are hereby repealed.

CHAPTER XLI.

AN ACT concerning the pleadings and proof in actions for damages for injuries or death caused by the alleged negligence of any person, copartnership or corporation, and declaring an emergency.

[S. 27. Approved February 17, 1899.]

Section 1. Be it enacted by the General Assembly of the State of Indiana, That hereafter in all actions for damages brought on account of the alleged negligence of any person, copartnership or corporation for causing personal injuries, or the death of any person, it shall not be necessary for the plaintiff in such action to allege or prove the want of con-

tributory negligence on the part of the plaintiff, or on the part of the person for whose injury or death the action may be brought. Contributory negligence, on the part of the plaintiff, or such other person, shall be a matter of defense, and such defense may be proved under the answer of general denial: Provided, That this act shall not affect pending litigation.

Sec. 2. Whereas, an emergency exists for the immediate taking effect of this act the same shall be in force from and after its passage.
